# DRAFT

**UNITED CITY OF YORKVILLE  
PUBLIC SAFETY MEETING  
Thursday, January 7, 2016 6:30pm  
City Hall Conference Room**

**In Attendance:**

Chairman Larry Kot  
Alderman Carlo Colosimo

Alderman Joel Frieders  
Alderman Seaver Tarulis

**Other City Officials in Attendance:**

City Administrator Bart Olson  
Police Chief Rich Hart

Deputy Chief Larry Hilt  
Deputy Chief Terry Klingel

**Others in Attendance:** None

The meeting was called to order at 6:30pm by Chairman Kot and a quorum was established.

**Citizen Comments:** None

**Minutes for Correction/Approval:** October 1, 2015

The minutes were approved as read on a unanimous voice vote.

**New Business:**

***1. PS 2016-01 Police Reports for September-December 2015***

Chief Hart said there was nothing noteworthy on these reports and the committee approved them with no further comment.

***2. PS 2016-02 Adjudication Reports for September-December 2015***

Alderman Frieders questioned the discrepancy of the totals of the fines issued on separate occasions for the same person. Mr. Olson will verify the figures. The committee then accepted the reports as presented.

***3. PS 2016-03 Noise Ordinance Discussion***

Mr. Olson said the EDC recommended hiring a consultant to review the noise issue in regards to the business called Pinheadz. He said he feels there will still be noise from vibrations even if the music volume is decreased. He is hoping the study will provide solutions for both the business and nearby property owners. Air vents in the business

were closed which helped the problem. It was noted bands will be present outside in the spring and Mr. Frieders suggested the consultant should study the problem at that time as well. Mr. Olson noted the liquor license requires that no noise from the patio should be heard 75 feet from the property. The business will also entertain erecting a 12-foot sound wall. City staff will proceed with the contract.

#### ***4. PS 2016-04 Tattoo Establishments - City Code Discussion***

Chairman Kot inquired if background checks can be done on individuals who rent chairs in tattoo parlors. Attorney Orr said the City cannot do that as those individuals have no financial control over the establishment. Alderman Colosimo suggested that licenses be required of all individuals doing tattoos, however, the City cannot require as a non-home rule municipality. There was also a discussion of suitable locations where a tattoo business could be permitted. This was an information item.

#### ***5. PS 2016-05 Adult Use – City Code Discussion***

The definition of massage as it pertains to the City ordinance was discussed and Alderman Kot said the City should be cautious with the ordinance wording. He requested a clarification email from Mr. Olson prior to the next committee meeting.

### **Old Business**

#### ***1. PS 2015-26 Public Safety Committee Meeting Dates for 2016***

Chairman Kot said he would like to adopt a quarterly meeting schedule with flexibility to have additional meetings when needed. The committee agreed.

### **Additional Business**

Alderman Frieders asked what police training is scheduled for the year. There is monthly in-house training and Chief Hart said one officer had requested to take a 10-week traffic reconstruction course at Northwestern, however, it is very expensive at \$6,000-\$7,000. When a reconstructionist is needed, Oswego or Aurora provides one. Expensive equipment is also needed.

Chief Hart also noted that Deputy Chief Klingel will be attending the FBI Academy in October. Other classes are being offered in the spring and officers will attend and then teach other department members. Training for Narcan (used for overdoses) was also discussed and it was noted that Kane County has stopped providing this training. Chief Hart said his officers have mixed emotions about administering the substance. Currently there is no money budgeted for this.

Body cams have been budgeted and Chief Hart briefly discussed the parameters of use and that a local company will be needed for video storage. Alderman Frieders noted the various components/expenses of using the cams such as training, video storage, handling malfunctions, etc.

Chairman Kot said he would like to begin a discussion of public safety facility needs at the next meeting and he asked for staff to gather some information. Chief Hart noted the need for a pole building for vehicle storage to prolong the life of electronics. A regional training facility with the ability to have wings added, would also be beneficial he said.

There was no further information and the meeting was adjourned at 7:10pm.

**Sent:** Wednesday, February 17, 2016 10:36 AM  
**To:** Rich Hart  
**Subject:** Destruction Order  
**Importance:** High

Sir,

At this time I am requesting to receive a destruction order for our Hewlett Packard Design Jet 500 printer (model # C7770B) (serial # SG08L1102K). We receive this from our building and zoning department approximately eight (8) years ago. The original purpose of us receiving this printer was to assist the accident reconstruction unit. Within the last few years this printer has become outdated. We have had a conversation with Krysti Barksdale-Noble, Community Development Director for the United City of Yorkville, she informed us that this device cannot be repaired and can be destroyed. If you have any other questions in reference contact me. Thank you in advance. Attached are photographs of the printer.

***Respectfully,  
Terry A. Klingel  
Deputy Chief  
Yorkville Police Department  
(630) 553-8504/ desk  
(630) 553-4340/Police Dept.

## **Police Facility**

## B. Police Facility

The new Police Facility should be a state of the art facility. The ideal placement is adjacent to a major traffic intersection. If situated near the judicial law courts on Rt 34. it would create a convenient law enforcement 'campus'.

Currently, there are approximately 23 existing sworn and unsworn officers, and the proposed facility expands to approximately 62 sworn and unsworn officer capacity. The current Yorkville police facility is a woefully inadequate space to function. The new state of the art facility should have: a premier law enforcement training center with classrooms, a firing range, field training offices, a patrol office, and records adjacent to a public access lobby and communications lobby. Officers should go from a secured officer parking lot into the building adjacent to the patrol and field training offices, through a secure area to locker rooms, to a firing range. The sallyport, is a secured and enclosed prisoner and evidence drop-off area and the first step in the suspect processing flow diagram. From here one should also be able to go to the evidence storage facility as well as booking work area and cell blocks. The property evidence area will have officer bag and tag areas, labs, evidence intake and vehicle examination bays.

Adjacent to these there should be police administration, IT, computer programming, community outreach and investigation. There should also be a DARE garage adjacent to the property evidence building. In addition to the headquarters building and because of the geographical separation in the community into the north and south resulting from the Fox River, there should be separate North and South outposts. Ideally these could be combined with the community centers to facilitate positive police interaction within the community.

# United City of Yorkville

Future Needs Assessment

Yas Architecture

From: Brad Sanderson, EEI  
Collette Frohlich, EEI  
CC: Eric Dhuse, Director of Public Works  
Krysti Barksdale-Noble, Community Dev. Director  
Lisa Pickering, Deputy City Clerk

Date: December 8, 2015  
Subject: Rt 47 and Main Street – Pedestrian Crossing

---

There are 11 pedestrian crossings across IL Route 47 within Yorkville city limits. Of the 11 crossings, only three (3) locations are located outside of a traffic signal: one (1) at Orange Street, one (1) at Hydraulic Street and one (1) at Main Street. At Orange Street, a set of school crossing signs have been installed that light up when a pedestrian push button is activated. A crossing guard is also present before and after school to aid the students in crossing IL Route 47. The crossings at Hydraulic Street and Main Street do not currently have lighted signs. A map showing the crossings along IL Route 47 is attached.

As requested, we investigated the pedestrian crossing on IL Route 47 at Main Street due to safety concerns raised by the City. Our findings are below.

## ***Existing Conditions and Observations:***

On Friday, December 4<sup>th</sup>, 2015, EEI personnel completed field investigations of the existing conditions and traffic patterns along IL Route 47 at Main Street.

IL Route 47 at the intersection with Main Street is a five (5)-lane roadway, two (2) lanes each direction with a left-turn lane on the northbound approach and a bidirectional left-turn lane on the southbound approach. The width of the roadway is 63 feet. The average daily traffic along IL Route 47 at this location is 19,500 vehicles per day (taken from the traffic count map on IDOT's website).

## ***Signage/Markings***

On northbound IL Route 47, a pedestrian crossing ahead sign is provided approximately 250' in advance of the crosswalk at Main Street, with a pedestrian crossing sign also located at the crosswalk. On southbound IL Route 47, a pedestrian crossing ahead sign is provided approximately 260' in advance of the crosswalk, with a pedestrian crossing sign also located at the crosswalk. The crosswalk is delineated by two (2) 6" wide white transverse markings with red colored concrete in between. Main Street is controlled by stop signs at both approaches and IL Route 47 is uncontrolled. A view of the crossing facing northbound is on the following page.

**Photo 1. Crosswalk on IL Route 47 at Main Street, Facing Northbound**

### *Traffic and Pedestrian Patterns*

Vehicular and pedestrian traffic was counted from 6:45am to 8:45 am and from 2:00 pm to 4:00 pm for the intersection of IL Route 47 and Main Street. During each of the time periods counted, a peak 30-minute period was identified. The table below shows the AM and PM ½ hour peak observed.

<b>Time Period</b>	<b><i>December 2015</i></b>	
	<b><i>Opposing Traffic</i></b>	<b><i>Pedestrians</i></b>
7:56-8:25 AM	911	1
3:25-3:54 PM	985	3

All pedestrians that crossed IL Route 47 at Main Street crossed the first two (2) lanes of traffic, waited in the bi-directional left turn lane, and crossed the other two (2) lanes of traffic when there was a large enough gap for them to continue. It was generally observed that the majority of the pedestrian traffic crossed IL Route 47 at Somonauk Street.

In addition to vehicular and pedestrian traffic counts, gaps in traffic greater than 21 seconds were also recorded as a gap long enough for a pedestrian to cross at this location. The 21 second interval was estimated using a crossing speed of 3.5 feet per second (taken from the MUTCD) and a pedestrian startup time of 3 seconds. There were five (5) gaps in the traffic on IL Route 47 that met that length in the AM period and five (5) gaps recorded in the PM period. According to the Institute of Transportation Engineers, longer crossing times are needed for school-aged children. They recommend using 2.0 feet per second for elementary school children, 2.5 feet per second for middle school children, and 3.0 feet per second for high school children. Based on those crossing speeds, only one (1) gap in the PM period was

long enough for elementary and middle school students, and two (2) additional gaps in the AM period were long enough for high school students. There were no gaps in the AM period that were long enough for elementary or middle school students.

### *Sight Distance*

One concern raised by the City was possible sight distance constraints of northbound motorists due to the steep grade of the approach. According to the AASHTO Green Book, the stopping sight distances on upgrades of 3% and 6% are 237 feet and 229 feet, respectively. Since the IL Route 47 improvement plans show a grade of 5.5% on the northbound approach, the stopping sight distance required would be slightly over 230 feet. When viewing the crossing from the pedestrian ahead crossing on the northbound approach, the pedestrian crossing sign is visible (see Photo 2 below). Since the pedestrian ahead sign is located approximately 250 feet from the crossing as stated earlier in this memo, it appears that the stopping sight distance requirement is fulfilled, although it may be more difficult for motorists to see smaller pedestrians at that distance.

**Photo 2. Northbound Approach of Pedestrian Crossing**

### *Street Lighting*

Another concern raised by the City was visibility of the pedestrians to passing motorists during nighttime conditions. There is currently an overhead light at the southeast corner of the intersection which provides some illumination. Similar lighting was also present before the recent IL Route 47 improvements. With the IL Route 47 lighting project, there will be four (4) additional light poles installed near the intersection in early 2016; two (2) on IL Route 47 and two (2) on Main Street. This will increase the visibility of the crosswalk and pedestrians and will meet the current standards.

## ***Analysis and Review of Conditions***

The section on crosswalks in the MUTCD is in the process of being updated. The updated portion will read as follows:

*“New marked crosswalks alone, without other measures (enhancements) designed to reduce traffic speeds, shorten crossing distances, enhance driver awareness of the crossing, and/or provide active warning of pedestrian presence, should not be installed across uncontrolled roadways where either:*

- A. The roadway has four or more lanes of travel without a raised median or pedestrian refuge island and an ADT of 12,000 vehicles per day or greater; or*
- B. The roadway has four or more lanes of travel with a raised median or pedestrian refuge island and an ADT of 15,000 vehicles per day or greater, or:*
- C. The speed limit exceeds 35 mph (60 km/h).”*

Since there are five (5) lanes of travel, no raised median or pedestrian refuge island present, an ADT of 19,500 vehicles per day, minimal pedestrian traffic, and very few gaps in traffic long enough for pedestrians to cross at this location, we would recommend that a pedestrian crossing not be installed at this location.

However, since the crossing has already been established, we have evaluated installing other measures to enhance driver awareness of the crossing and provide active warning of pedestrian presence.

## ***Signal Warrants***

First, we reviewed the traffic signal warrants based on pedestrian volume. According to the MUTCD, Signal Warrant 4, Pedestrian Volume, the minimum required number of pedestrians crossing the major street at an intersection during an average day is 107 or more for each of any four hours or 133 or more for any one hour period. For Signal Warrant 5, School Crossing, the minimum required number of pedestrians is 20 during the highest crossing hour. Since neither warrant is met based on pedestrian volume observed, the need for a traffic signal is not justified.

## ***Pedestrian Hybrid Beacons***

A pedestrian hybrid beacon is used to control traffic at an unsignalized location to assist pedestrians in crossing at a marked crosswalk. It can be used at locations where a traffic signal is not warranted or the decision was made to not install a traffic control signal. However, the guidelines for installation of a pedestrian hybrid beacon require a minimum pedestrian volume of 20 for one hour of an average day. The pedestrian volume observed does not fit this criterion, so installing a pedestrian hybrid beacon is not justified.

## ***Increasing Sign Conspicuity***

Since traffic signals and pedestrian hybrid beacons are not warranted, another option is increasing the sign conspicuity of the pedestrian crossing signs. Section 2A.15 of the MUTCD offers several suggestions to accomplish this. Some options that could be used include: adding a red or orange flag above signs,

adding a warning beacon to the sign, adding LED lights to the sign, or adding a strip of retroreflective material to the sign support.

### *Pavement Markings*

Pavement markings can also be used to supplement the conspicuity of a crosswalk, such as adding ladder markings within the transverse crosswalk lines. However, because of the grade of the northbound approach, motorists cannot see the crosswalk markings until they are fairly close. For that reason, this may not be an appropriate option.

### *Conclusions and Recommendation*

If the City chooses to enhance driver awareness, based on our observations we would recommend signage enhancements to the pedestrian crossing. We recommend the Rectangular Rapid Flashing Beacon (RRFB) as it is more conspicuous to motorists. Photo 3 (below) shows an example of a RRFB assembly at a crosswalk. We recommend replacing the existing pedestrian crossing signs accompanying the “AHEAD” plaque to be replaced with LED blinker signs. We also recommend replacing the existing signage assemblies at the crosswalk (pedestrian crossing signs with diagonal downward arrow plaques) with RRFB assemblies with pedestrian push buttons (new assemblies to include the pedestrian crossing sign and diagonal downward arrow plaque). A signage enhancement exhibit is attached.

**Photo 3. Sample RRFB Installation in Phoenix, AZ**

### *Signage Costs*

The flashing blinker signs are approximately \$1,800 per sign. The RRFB assemblies with pedestrian push button (including the pedestrian crossing sign and diagonal downward arrow plaque) cost approximately \$5,000 per assembly. The total cost of the proposed signage enhancements is approximately \$13,600.

### *IDOT/FHWA Requirements*

Since the signage enhancements would be performed within state right-of-way, an IDOT highway permit will be required. The Highway Permit form (OPER 1045) will need to be filled out including a description of the proposed work, location map, detailed drawings, traffic studies, traffic control plan and other pertinent information. IDOT will review the permit request and determine if anything other information is required to be submitted, such as the Individual Highway Permit Bond (OPER 1046).

The RRFB is not in the current version of the MUTCD but an Interim Approval (IA-11) Memorandum has been issued. In order to install the RRFB, the Federal Highway Administration requires a letter to request approval of installation.

### *Future Considerations*

Further study may be prudent in warmer weather as pedestrian counts may be higher in the spring or summer months than what was observed at this time. In addition, more commercial development may warrant review of the safety of the crossing to ensure that no changes in traffic patterns or pedestrians affect the safety and mobility.
