DRAFT

UNITED CITY OF YORKVILLE PUBLIC WORKS COMMITTEE Tuesday, July 17, 2018, 6:00pm Yorkville City Hall, Conference Room

800 Game Farm Road

IN ATTENDANCE:

Committee Members

Vice-Chairman Ken Koch Alderman Seaver Tarulis

Alderman Jackie Milschewski

Absent: Alderman Joel Frieders

Other City Officials

City Administrator Bart Olson Engineer Brad Sanderson, EEI
Assistant City Administrator Erin Willrett Public Works Director Eric Dhuse

Facilities Manager Steve Raasch

Other Guests:

Lisa Wolancevich Thomas Milschewski

Johanna Byram

The meeting was called to order at 6:00pm by Vice-Chairman Ken Koch.

Citizen Comments: None

Previous Meeting Minutes: June 19, 2018

The minutes were approved as presented.

New Business:

1. PW 2018-65 Capital Improvement Projects Update

Mr. Sanderson said this report is the quarterly update and there was no further comment.

2. PW 2018-66 Bond/LOC Reduction Quarterly Update

This is also a quarterly update and Mr. Sanderson said there were no reductions in the last quarter.

3. PW 2018-67 NPDES Annual Report

Mr. Sanderson said this is the annual report regarding stormwater and compliance with the permit. No further comment.

4. PW 2018- 68 2018 Sanitary Sewer Lining Change Order No. 1

The first phase of the sanitary sewer lining project is complete. The contractor said there were some very hard calcium deposits requiring special equipment which increased the cost. There is also additional work being added due to a significant amount of stormwater getting into the sewer in Raintree Village in 3 areas. Mr. Sanderson recommended repairing them at a total increase of \$17,312.50 that is within the budgeted amount. This item moves to the consent agenda.

5. PW 2018-69 Small Cell Wireless Fees and Code Amendment

Ms. Willrett said a Small Wireless Facilities Deployment Act was recently passed with new rules, regulations and fees. This applies to small wireless companies that wish to place their equipment on existing poles. The change is to the right of way ordinance. There are 2 existing poles grandfathered in, one of which is in front of city hall. The city will receive a recurring payment since the antenna is on a city-owned utility pole. This moves to the Planning and Zoning Commission for Public Hearing and then to City Council regular agenda. Action is needed by August 1.

6. PW2018-70 Ground Effects Sidewalk

This was discussed last month and after examination of the area, Mr. Sanderson said the right-of-way is only 3 feet wide on the south by Ground Effects. This leaves no room to build there unless right-of-way is purchased. As a result, 3 options were determined:

- 1. Move proposed sidewalk to north side, would result in additional crossings.
- 2. Build sidewalk next to curb, purchase right-of-way, existing landscaping in the area needs to be relocated.
- 3. Carrying sidewalk through in right-of-way, trees and patios to be relocated, very costly. Alderman Koch said he also met with residents from Briarwood and that many residents in the area use the existing path. He asked if there is possible recapture from future development in the area. It is possible it could be part of a future development agreement. A reduced cost estimate was requested for the next meeting and staff will examine the budget for possible funding.

7. PW 2018-71 Old Jail RFP

Mr. Olson presented the bids for demolition and the low bidder was D Construction at \$78,000. He said there were 6 bidders all of whom submitted costs for remediation. This will be discussed at the July 24th Council meeting. Environmental contractors were also contacted and a bid of \$27,000 for remediation only, was given.

Lisa Wolancevich with the Save the Old Jail project presented some information and questions. In answer to one of her questions, Mr. Olson said an IEPA law had been passed in January that requires environmental issues be remediated prior to demolition of structures. He said there is asbestos on the pipes, lead paint, etc., as determined by an environmental inspector.

Ms. Wolancevich said the State of Illinois has recognized the building as being eligible for National Registry of Historic Places and there are only 2 such buildings left in the country. The Illinois State Preservation Office needs to be contacted prior to demolition or any other action. A walk-through was conducted at the end of June and Mr. Raasch said protective measures were taken prior to entry. Ms. Wolancevich said she and the board-up company did not wear any protective clothing when they made entry. Her group is filling out paperwork for the National Trust. There were other brief questions regarding oil tanks and the roof material. The preservation group said they would like to see a different direction taken other than demolition. This matter will go before the Council on July 24th.

8. PW 2018-72 Metra Support Resolution

Mr. Olson said CMAP does a regional comprehensive plan every 10 years and to have projects listed in the plan, ideas must be submitted and vetted by CMAP. The Metra project will be submitted as high priority and staff will ask for a resolution of support from the Council. Oswego is doing the same. This moves to the consent agenda.

Old Business:

1. PW 2018-58 Beecher Center HVAC - Award of Contract

A budget amendment has been approved and staff is waiting on approval of the low bidder after FY 2018 budget numbers are solidified, said Mr. Olson. One of the HVAC units is beyond repair. Staff recommends the low bidder, Trico, at \$340,000. This will move to the regular agenda for the next Council meeting and will require a simple majority vote.

Additional Business:

There was no further business and the meeting was adjourned at 6:33pm.

Minutes respectfully transcribed by Marlys Young, Minute Taker

Memorandum

To: Public Works Committee

From: Eric Dhuse, Director of Public Works

CC: Bart Olson, Administrator

Date: July 26, 2018

Subject: PW truck sales and purchases

Summary

I am asking to buy two new trucks for public works through the state purchase bid. We currently have \$50,000 budgeted in the Water Fund for this expense. At the same time, I am asking for permission to sell a truck from our current fleet that we inherited from the engineering department and have continued to use since 2010.

Background

Public Works is trying to replace vehicles that we haven't been able to replace since the downturn in the economy in 2008. By updating our fleet, we are increasing our reliability and lowering our repair costs.

Truck that I would ask permission to sell:

1. 2004 Ford F150 4x4. Mileage 123,041. This truck is primarily used to perform utility locates on a daily basis. This truck was inherited from the engineering department in 2010 and is now really starting to show its age. The body is rusting, the engine and drivetrain are past their useful lives and should be replaced. Today, 123,000 miles on a vehicle is fairly normal. Unfortunately, these are not normal miles. These miles are all in town miles or off road in construction area miles. Neither of which are easy on a vehicle. I would ask permission to sell this vehicle at auction. I believe that we will get the most exposure to the largest group of potential buyers if we auction it as opposed to sealed bid. We will send this vehicle with others that we already have permission to dispose of to get rid of everything at once.

Trucks I am asking permission to buy:

- 1. Ford F150 two wheel drive pickup. This truck would be utilized for utility locates on a daily basis. I have attached the build sheet which outlines the specific details of the truck for your review and comment. In addition to the pickup, we will have to purchase a bed topper to keep the locating equipment dry. The cost of the cap is approximately \$2500 which is additional to the \$24,985 price of the truck, for a total of \$27,485.
- 2. Ford F250 4x4 with snow plow. This truck will be used as a daily driver for the water department to use for customer service calls, or other duties. This truck would also be equipped with an 8'6" snow plow to assist in snow removal operations. With the snowplow, the total for this truck is \$36,275.00

Recommendation

I recommend the purchase of one Ford F150 from Morrow Brothers Ford of Greenfield IL for a cost not to exceed \$25,000. In addition, I would ask that the City Council authorize the Director of Public Works to purchase a cap for the truck for a cost not to exceed \$2,500. I would also recommend the purchase of one 2018 Ford F250 from Landmark Ford of Springfield, IL. For a cost not to exceed \$36,500.

The total cost for both pickups, cap and snow plow will be approximately \$64,000 with only \$50,000 budgeted this year. This leaves a difference of \$14,000 that would need to be funded from other mechanisms. Finance Director Fredrickson suggested that we purchase the F150 and the snow plow at a total cost of \$34,885 from the Public Works Capital cost center of the Vehicle & Equipment (25) Fund. This Fund has an ending PW Capital fund balance of \$37,930 (unaudited) at the end of FY 2018, as a result of pw capital fees exceeding budgetary expectations. This suggestion was made since the F150 will be used to perform locates which benefit all PW departments and the snow plow will be used for street department purposes. A budget amendment ordinance, increasing the PW Capital cost center any vehicle line item from \$0 to \$35,000 has been attached for your review. The Ford F250 should be purchased by the water department since its primary use will be in that department. We currently have \$50,000 budgeted for vehicles in the water department. This expense will be approximately \$28,875 leaving us a balance of \$21,125 remaining in the budget. I intend to revisit vehicle purchases at the midway point of the year to see if we can afford a Ford Transit van to use for the installation of water meters. By dividing the costs between the funds, we are able to better where the assets are being used and coding them to the proper department for the audit.

In addition to Finance Director Fredrickson, I also spoke with our Purchasing Manager, Carri Parker to make sure that using the state purchase bids was the most economically feasible route that the City could take. Although she has purchased vehicles from local dealerships, she agreed that the state purchase bids are usually the lowest bid and that it is a good program to use to purchase vehicles.

I would ask that this be placed on the August 21, 2018 Public Works Committee agenda for discussion. Please let me know if you have any questions or need further information.

Ordinance No. 2018-

AN ORDINANCE AUTHORIZING THE SEVENTH AMENDMENT TO THE ANNUAL BUDGET OF THE UNITED CITY OF YORKVILLE, FOR THE FISCAL YEAR COMMENCING ON MAY 1, 2018 AND ENDING ON APRIL 30, 2019

WHEREAS, the United City of Yorkville (the "City") is a duly organized and validly existing non-home rule municipality created in accordance with the Constitution of the State of Illinois of 1970 and the laws of the State; and,

WHEREAS, pursuant to 65 ILCS 5/8-2-9.4, the City adopted Ordinance No. 2018-26 on April 10, 2018 adopting an annual budget for the fiscal year commencing on May 1, 2018 and ending on April 30, 2019; and,

WHEREAS, pursuant to 65 ILCS 5/8-2-9.6, by a vote of two-thirds of the members of the corporate authorities then holding office, the annual budget of the United City of Yorkville may be revised by deleting, adding to, changing or creating sub-classes within object classes and object classes themselves. No revision of the budget shall be made increasing the budget in the event funds are not available to effectuate the purpose of the revision; and,

WHEREAS, funds are available to effectuate the purpose of this revision.

NOW THEREFORE, BE IT ORDAINED by the Mayor and City Council of the United City of Yorkville, Kendall County, Illinois, as follows:

Section 1: That the amounts shown in Schedule A, attached hereto and made a part hereof by reference, increasing and/or decreasing certain object classes and decreasing certain fund balances in the Vehicle & Equipment fund with respect to the United City of Yorkville's 2018-2019 Budget are hereby approved.

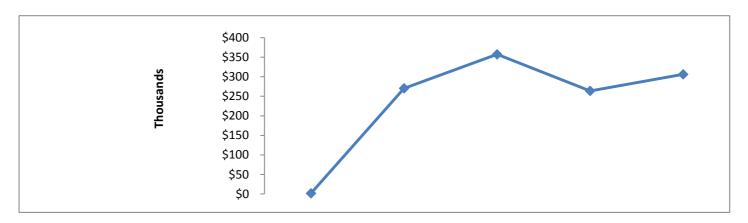

Section 2: This ordinance shall be in full force and effect from and after its passage and approval according to law.

VEHICLE & EQUIPMENT FUND (25)

This fund primarily derives its revenue from monies collected from building permits, fines and development fees. Revenues are used to purchase vehicles and equipment for use in the operations of the Police, General Government, Public Works Street Operations and Park & Recreation departments.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI
CC: Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: July 12, 2018 Subject: Caledonia

The developer has completed the remaining punchlist items and we are now recommending a full release of their remaining performance security. The value of the remaining security is \$60,000 per the attached.

The public improvements were accepted on February 28, 2017.

If this is acceptable, please let us know. Upon approval, we will then inform the developer.

March 27, 2018

AMENDMENT NO. 1

TO

IRREVOCABLE LETTER OF CREDIT NO. 2912

Mayor and Aldermen United City of Yorkville 800 Game Farm Road Yorkville, IL 60560

Re: Caledonia Subdivision Phase I and II Irrevocable Letter of Credit No. 2912 dated March 23, 2017 Ziemia, LLC

Gentlemen:

Pursuant to the letter dated February 28, 2018 from Engineering Enterprise, Inc. and City Council approval at the February 27, 2018 meeting we hereby amend Irrevocable Letter of Credit No. 2912 follows:

The amount of the letter of credit is hereby decreased from \$557,615.58 to \$60,000.00.

The expiration date is changed from February 28, 2018 to July 1, 2018.

All other terms and conditions remain the same.

Sincerely,

Travis Andry

Sr. Vice President Regional Manager

Old Second National Bank

37 S. River St.

Aurora, IL 60506

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: February 1, 2018

Subject: Caledonia

The purpose of this memo is to provide an update as to the status of the completion of the improvements for the development.

Background:

The City accepted the public improvements at their Council meeting on February 28, 2017. The developer then provided a one-year maintenance guarantee (value = \$557,615.58) as required by City code to cover any additional deficiencies.

EEI re-inspected the development in the fall of 2017 and issued a punchlist with several outstanding items (see attached). Many of the items were completed, however the following items remain:

- Bituminous surface course crack routing and sealing
- Replacement of dead or removed trees in parkway
- Removal of voluntary/nuisance trees growing in Lot A Detention Basin

The crack routing/sealing and tree replacement need to be completed in appropriate weather conditions. The maintenance guarantee that is on file will expire on February 28, 2018.

Discussion:

Staff has reviewed the situation and have determined that the following options are available:

- 1. Require that the developer renew the letter of credit at full value with a new expiration date. We would recommend an expiration date of July 1, 2018 if this were chosen. If the developer refuses, call the full letter of credit.
- 2. Require that the developer provide a new letter of credit with a reduced value to cover the remaining work items. We would recommend a value of \$60,000 and an expiration date of July 1, 2018.
- 3. Call the full letter of credit and complete the work in the Spring.

If the direction is to call the letter of credit, staff would prepare a letter of default and issue it to the developer. This would be the first step in officially calling the letter of credit and afford the developer an additional sixty (60) days to complete the required improvements, or until the end of April before the City moves to call the security.

Staff is recommending proceeding with option No. 2.

Action Required:

Staff is requesting direction on how to proceed.

September 27, 2017

Ms. Krysti Barksdale-Noble Community Development Director United City of Yorkville 800 Game Farm Road Yorkville, IL 60560

Re: Caledonia - Phases 1 and 2 (1 Year Maintenance Inspection)

United City of Yorkville Kendall County, Illinois

Ms. Barksdale-Noble:

Representatives from Engineering Enterprises, Inc. performed an onsite punch list inspection of the public improvements for the above referenced project. A summary of the punch list items is listed below.

Sanitary Sewer

1. Structures S-4-4 & S-4-5-1 shall have the frame and lid replaced,

Storm Sewer

2. The following storm structures need to have the fillets installed, reinstalled, or repaired:

CB 322 INL 305 INL 341 CB 359 INL 507 INL 410

CB 409 INL 323

- 3. The following structures have cracked adjusting rings which need to be replaced: CB-118 (mortared around rings) and CB-143
- 4. The following structures shall be cleaned of debris: INL-308, INL-341, CB-405, E-700,
- 5. The following structures had filter fabric or basket and could not be inspected: CB-114, CB-239, CB-322 and INL-341.
- Structure CB-143 shall be located and raised to grade.
- 7. The following structures need to have their sump connections mortared: CB-239 and CB-355.
- 8. The following structures need to have their frames and adjusting rings reset: CB-114, CB-355, M-107, M-129, M-324, CB-356 and M-358.

Ms. Krysti Barksdale-Noble September 27, 2017 Page 4

9. We were unable to access CB-355 due to excessive weeds. The weeds shall be removed and CB-355 inspected.

Water Main

- 10. The auxiliary valve boxes for the following hydrants are at temporary grade but shall be raised to the finish grade once the house on the lot is built. : FH 29, FH 42, FH 48.
- 11. VB-9A box and frame is entirely broken and shall be replaced.

Roadway

- 12. All weeds and vegetation growing in the curb joint and between the curb line and pavement shall be removed.
- 13. The surface course is showing several cracks. The surface course should be routed and sealed.
- 14. Street name signs need to be installed at the corner of Shadow Wood Drive and Lauren Drive and the corner of Crestwood Drive and Lauren Drive.

Landscaping

- 15. Several parkway trees in front of developed lots are missing, have died or have been removed and shall be installed/replaced per the landscape plan, see attached exhibit for locations.
- 16. There are voluntary/nuisance trees growing in Lot A Detention Basin. These trees shall be removed, see attached exhibit for locations.
- 17. The entry monument shall be installed per plan.

If you have any questions or require any additional information please contact our office,

Very truly yours,

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: August 6, 2018

Subject: Casey's Yorkville - Acceptance

The developer has requested that the City accept the public improvements for ownership and maintenance.

All work related to the public improvements, including punch list work has been completed. We recommend that the public improvements (water main, sanitary sewer, and sidewalk) as described in the attached Bill of Sale be accepted for ownership and maintenance by the City.

As required by City Code, the developer will be responsible to provide a performance guarantee to cover the one-year maintenance period. This period starts after the City formally accepts the improvements.

Along with final acceptance, there is a bond reduction to 10% of the value of the public improvements (Maintenance Guarantee).

The existing bond and new amounts are as follows:

Merchants Bonding Company

Subdivision Bond No. ILC65613 (Existing) \$158,738.00

Original Approved EOPC (Public Improvement Portion) \$76,038.00 **Required Value (10% of Original)** \$7,603.80

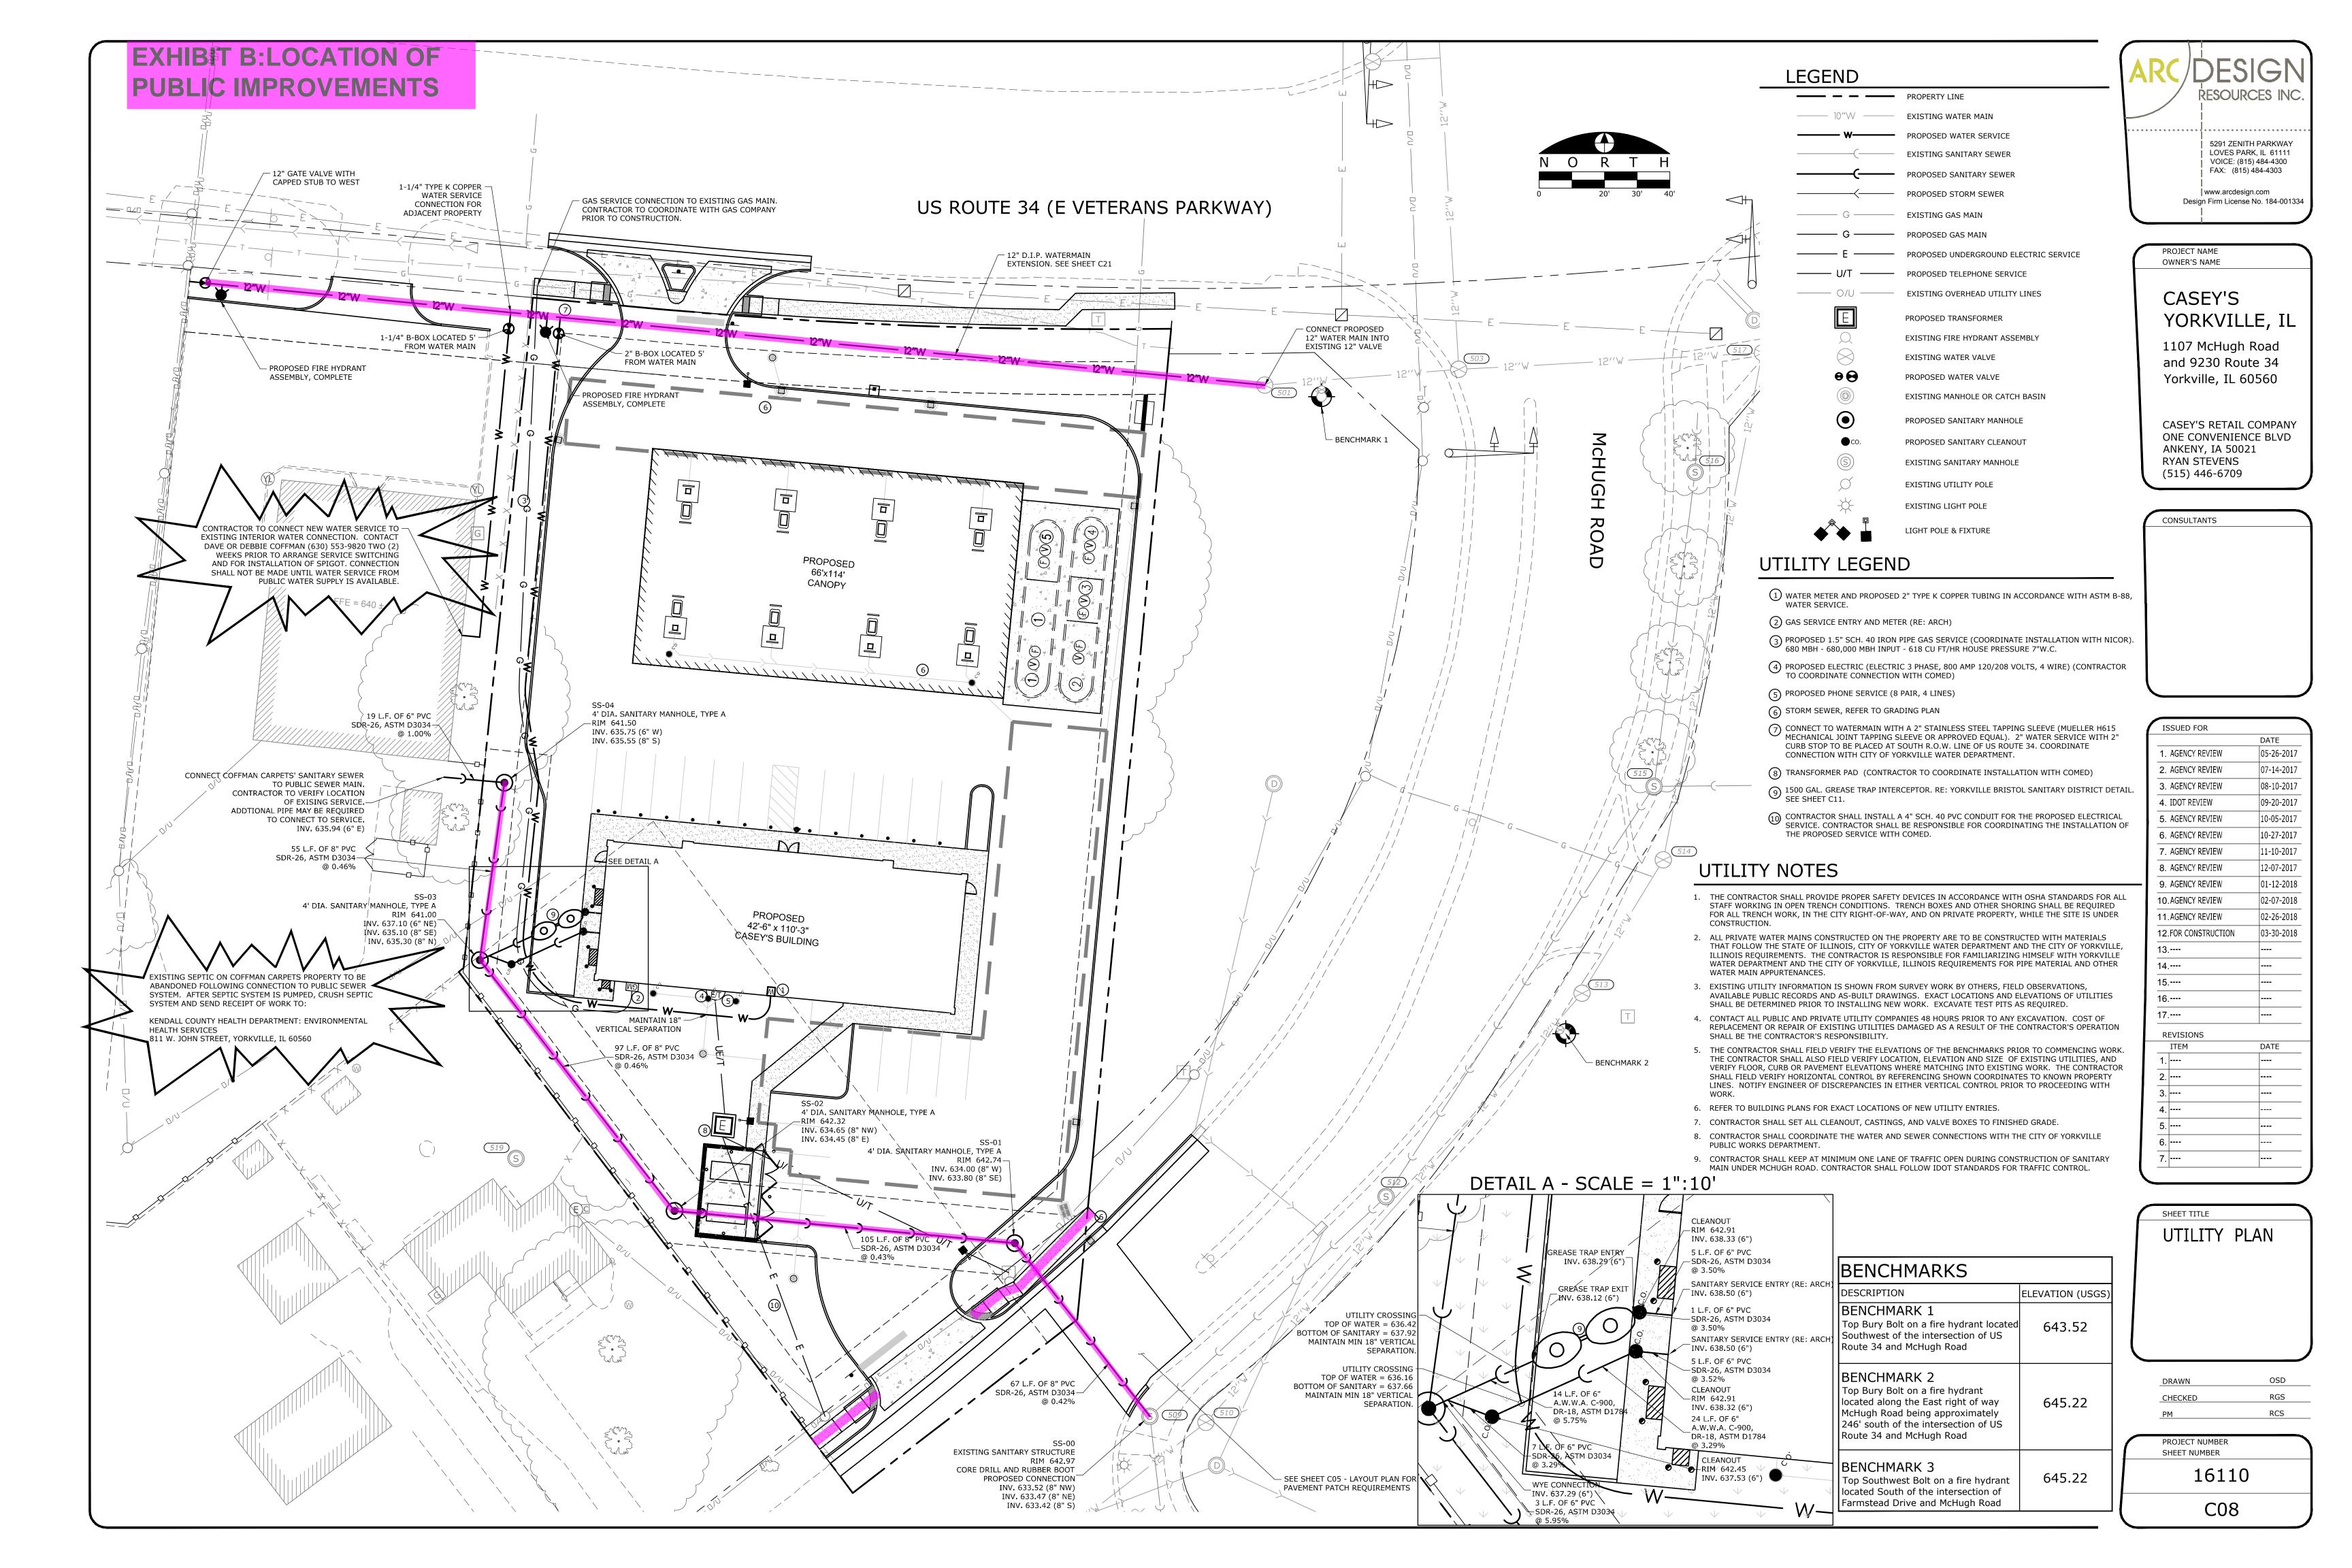

Net Allowable Reduction \$151,134.20

Upon City Council approval of the acceptance and the receipt of the executed Bill of Sale and new guarantee amount, the existing security may then be released. If you have any questions or require additional information, please call.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: August 8, 2018

Subject: Fox Highland – Raintree Village Water Main Interconnect – Comed

Easement

Background:

The United City of Yorkville submitted for permission to cross Comed right-of-way earlier this year in March as part of the above referenced project. Comed has completed its review and has provided a Water Easement Agreement for consideration by the City.

The easement is necessary for the City to complete the water main project. As a reminder, this work is driven by the widening of Rt 71 by IDOT.

Question Presented:

Should the City execute the easement documents?

Discussion:

The easement documents have been reviewed by the City Attorney and have been found acceptable.

We are recommending approval of the easement documents.

Action Required:

Consideration of approval.

WATER EASEMENT AGREEMENT

THIS Water Easement Agreement ("Easement") is made as of this ____ day of ______, 2018 by and between COMMONWEALTH EDISON COMPANY, an Illinois corporation ("Grantor"), with a mailing address of P.O. Box 767, Chicago, Illinois 60690-0676, and UNITED CITY OF YORKVILLE, ("Grantee").

RECITALS:

- A. Grantor is the owner of a parcel of land in Yorkville, County of Kendall and State of Illinois, commonly known as Fox-Illinois Union R/W Parcel 5 described in Exhibit A attached hereto and made a part hereof ("Grantor's Property").
- B. Grantor titilizes Grantor's Property for Grantor's own business operations, which operations, for purposes hereof, shall include without limitation the construction, reconstruction, maintenance, repair, upgrade, expansion, addition, renewal, replacement, relocation, removal, use and operation of Grantor's equipment and facilities, whether now existing or hereafter to be installed, in, at, over, under, along or across Grantor's Property (collectively, "Grantor's Operations").
- C. Grantee desires to install two (2) eight inch (8") water main pipe crossings along a center line across Grantor's Property in the location shown on the diagram attached hereto as Exhibit B (for the purposes of this Easement, the "Easement Premises" shall be a strip of land ten feet (10') wide and one fifty feet (50') long water main as shown on the diagram attached hereto as Exhibit B)
- NOW, THEREFORE, in consideration of Ten and No/100ths Dollars, the payments, covenants, terms, and conditions to be made, performed, kept and observed by Grantee hereunder and other good and lawful consideration, Grantor and Grantee hereby agree as follows:
- 1. <u>Grant of Easement.</u> Subject to the terms and provisions of this Easement, Grantor hereby grants and conveys, without warranty of title, a perpetual, non-exclusive easement for the right and privilege to use the Easement Premises for the following purposes and for no other purpose whatsoever: construction and maintenance of two (2) eight inch (8") water main pipes in substantial conformity with the engineering plan sheets 7 & 5 of 13, prepared by Engineering Enterprises, Inc. dated February 2018 and known as Fox Highland Raintree Village Water Main Interconnect attached hereto as <u>Exhibit B</u> and made a part hereof .(hereinafter referred to as the "Facilities").

- 2. <u>Grantee's Use</u>. The following general conditions shall apply to Grantee's use of the Easement Premises:
- (a) Grantee shall procure and maintain at its own expense, prior to entry upon Grantor's Property hereunder, all licenses, consents, permits, authorizations and other approvals required from any federal, state or local governmental authority in connection with the construction, placement, use and operation of the Easement Premises and the Facilities, and Grantee shall strictly observe all laws, rules, statutes and regulations of any governmental authorities having jurisdiction over the Easement Premises or Grantee's operations thereon. Grantor may from time to time request reasonable evidence that all such approvals have been obtained by Grantee and are in full force and effect. In no event shall Grantee seek any governmental approvals that may affect in any way Grantor's Operations, including without limitation any zoning approvals, without in each instance obtaining Grantor's prior written consent, which consent may be granted or withheld in Grantor's sole discretion.
- (b) In the event any aspect of Grantee's construction, placement, maintenance, repair, use or operation of the Easement Premises and the Facilities at any time violates or is forbidden by any law, statute, rule, regulation, order or requirement of any governmental authority, Grantee shall immediately discontinue such operations and at its own expense take all required corrective action, including without limitation removal of all or any portion of the Facilities from Grantor's Property if required, within the lesser of (i) thirty (30) days from Grantee's notice of such violation or (ii) the period of time required by law for the correction of such violation.
- (c) Grantee's use of the Easement Premises shall be conducted in a manner that does not conflict or interfere with Grantor's Operations.
- (d) This Easement and the rights granted hereunder are subject and subordinate in all respects to all matters and conditions affecting the Easement Premises (whether recorded or unrecorded).
- (e) Grantee's obligations and liabilities to Grantor under this Easement with respect to the Easement Premises and the Facilities and all other matters shall not be limited or in any manner impaired by any agreements entered into by and between Grantee and any third parties, including without limitation any agreements related to the construction or installation of the Facilities, and Grantee shall be and remain liable to Grantor for the installation and operation of the Facilities in accordance with the terms and conditions of this Easement, notwithstanding Grantee's failure or refusal to accept delivery of or title to such facilities from any such third parties.
- (f) Without limiting the generality of the foregoing, this Easement and the rights granted hereunder are subject and subordinate in all respects to the existing and future rights of Grantor and its lessees, licensees and grantees, existing roads and highways, the rights of all existing utilities, all existing railroad rights-of-way, water courses and drainage rights that may be present in Grantor's Property. If required, Grantee shall secure the engineering consent of such prior grantees as a prerequisite to exercising its rights hereunder and provide Grantor with a copy of the same.
- 3. <u>Term.</u> The term of this Easement shall be perpetual, unless sooner terminated in accordance with the provisions of this Easement, and shall commence as of the date first hereinabove written.
- 4. <u>Fees.</u> In partial consideration of this Easement, Grantee shall pay Grantor a certain sum of money as set forth in a separate agreement between Grantor and Grantee, which amount shall be due and payable to Grantor, prior to Grantor's execution of this Easement.

5. Rights Reserved to Grantor.

- (a) Grantor's rights in and to the Easement Premises, Grantor's Property and Grantor's Operations are and shall remain superior to Grantee's rights granted hereunder. Grantor shall not be liable to Grantee for damage to the Facilities due to Grantor's Operations and/or the installation, operation, maintenance or removal of any present or future facilities of Grantor.
- (b) Grantor reserves the right to grant additional leases, licenses, easements and rights hereafter to third parties through, under, over and across all or any portion of Grantor's Property, including the Easement Premises, so long as there is no material adverse impact on Grantee's rights in and use of the Easement Premises pursuant to the terms of this Easement. In the event of a violation of this Paragraph 5(b), Grantee's sole and exclusive remedy against Grantor shall be seeking an injunction preventing such third party from creating such material adverse impact on Grantee's rights as aforesaid.
- 6. <u>Relocation and Restoration of Easement Premises</u>. The following terms and conditions shall govern the rights and obligations of the parties with respect to relocation and restoration of the Easement Premises:
- (a) In the event any alteration, expansion, upgrade, relocation or other change in Grantor's Operations interferes or conflicts with Grantee's use of the Easement Premises hereunder, Grantor shall notify Grantee in writing of such proposed change and the conflict posed by this Easement or the presence of the Facilities on the Easement Premises. Such notice shall contain Grantor's estimate of the additional costs Grantor will incur if the proposed change in Grantor's Operations must be altered to avoid or minimize any conflict or interference with Grantee's use of the Easement Premises. Within ten (10) days after receipt of such notice, Grantee shall notify Grantor in writing of its election to (i) make such changes in the Facilities, at Grantee's cost, as in the judgment of Grantor may be required to avoid or minimize any conflict or interference with the proposed change in Grantor's Operations, including without limitation the relocation of the Easement-Premises and the Facilities to another location owned by and designated by Grantor, or (ii) reimburse Grantor for all additional costs incurred by Grantor in altering the proposed change in Grantor's Operations to avoid or minimize such conflict or interference. In the event Grantee fails to notify Grantor in writing of such election within such ten (10) day period, Grantee shall be conclusively deemed to have elected to reimburse Grantor for its additional costs as provided in clause (ii) hereinabove. In the event Grantee elects to make all changes to the Easement Premises and/or the Facilities, including relocation to another location designated by Grantor, required to avoid conflict with the proposed change in Grantor's Operations, Grantee, at its sole cost and in accordance with all applicable terms and conditions of this Easement, shall promptly take all steps necessary to complete such changes and relocation within a reasonable time but in no event later than sixty (60) days after the date of such election. In the event Grantee elects to reimburse Grantor for the additional costs to be incurred by Grantor, Grantee shall make such payment within thirty (30) days after Grantor's demand therefor.
- (b) Grantee agrees that, within thirty (30) days after the termination of this Easement for any reason, Grantee shall, at its sole cost and expense and only if directed to do so by Grantor in Grantor's sole discretion, remove all of the Facilities from Grantor's Property and restore and repair Grantor's Property to the condition existing prior to the installation of the Facilities. In the event Grantee fails to so remove the Facilities and restore and repair Grantor's Property, Grantor may elect to do so at Grantee's sole cost and expense, and, in such event, Grantor may dispose of the Facilities without any duty to account to Grantee therefor. Grantee shall pay all costs and expenses incurred by Grantor in removing the Facilities, including any storage costs, and any costs incurred by Grantor in restoring and repairing Grantor's Property. Any facilities and equipment that Grantee fails to remove from Grantor's Property within thirty (30) days after the termination of this Easement shall be conclusively deemed to have been

abandoned by Grantee and shall become the sole property of Grantor, without liability or obligation to account to Grantee therefor.

7. Condition of Grantor's Property. Grantee has examined the Easement Premises and knows its condition. Grantee hereby accepts the condition of the Easement Premises in its AS-IS, WHERE-IS CONDITION, WITH ALL FAULTS. No representations as to the condition, repair or compliance thereof with any laws, and no agreements to make any alterations, repairs or improvements in or about the Easement Premises have been made by or on behalf of Grantor. By accepting possession of the Easement Premises, Grantee shall be conclusively presumed to have accepted the condition thereof and to have unconditionally waived any and all claims whatsoever related to the condition of the Easement Premises.

8. Conditions Governing Construction, Repair, Maintenance and Other Work.

- (a) All work performed by Grantee pursuant to this Easement, including without limitation all work related to the installation, alteration, maintenance (excluding only routine maintenance), repair, relocation, replacement or removal of the Easement and the Facilities, shall be performed in accordance with plans and specifications approved in writing by Grantor prior to the commencement of such work. Grantor shall review and approve any amendments, additions or other changes to such approved plans and specifications, prior to the performance of any work identified therein. Grantor shall have the right (but not the obligation) to supervise Grantee's performance of any such work at the Easement Premises (or any component thereof) and, in the event that Grantor so elects, Grantee shall reimburse Grantor for any and all costs of such supervision, together with a charge for Grantor's overhead, as determined by Grantor.
- (b) Prior to the performance of any work, Grantee shall (i) obtain all applicable permits, approvals and authorizations required from any federal, state or local governmental authorities and furnish Grantor-with-satisfactory evidence that all such approvals have been obtained and (ii) furnish Grantor with certificates-of insurance for each contractor and subcontractor evidencing such contractor's or subcontractor's compliance with the requirements of Section 11 hereof.
- (c) Except for emergency repairs affecting the health and safety of the public, Grantee shall provide Grantor with not less than thirty (30) days advance notice of any work (including routine maintenance) so that Grantor may take such protective actions as Grantor deems necessary to ensure the safety and reliability of Grantor's facilities in the area of Grantee's proposed work. Grantee shall postpone the commencement of its work until such time as Grantor has completed any and all such protective work. Any cost and expense of such protective work shall be borne by Grantee and paid by Grantee within thirty (30) days after receipt of a bill therefor.
- (d) Grantee hereby agrees that, in the event that Grantee (or any employee, agent, representative, contractor, licensee, invitee or guest of Grantee) performs any grading, leveling, digging or other work of any kind on the Grantor's Property (to the extent expressly permitted under the terms of this Easement) and damages any improvements, fixtures, facilities, equipment, or other property located (now or in the future) at Grantor's Property, then Grantee will either (at Grantor's sole election), (x) promptly cause any such improvements, fixtures, facilities, equipment or other property to be repaired and restored to the same or better condition as the same were in immediately prior to such damage or destruction, or (y) promptly pay Grantor the amount which Grantor estimates (as set forth in a written notice from Grantor to Grantee) will cover the cost and expense of repairing and restoring such damage or destruction. Prior to performing any such grading, leveling, digging or excavation work on the Easement Premises (which work shall be subject to Grantor's prior written approval), Grantee will notify J.U.L.I.E. at telephone number (800) 892-0123, C.U.A.N. at (312) 744-7000 if the Easement Premises are located in

the City of Chicago, or in the event the Easement Premises are located outside J.U.L.I.E.'s or C.U.A.N.'s jurisdiction, any other services required by the utilities in the jurisdiction where the Easement Premises are located, at least seventy-two (72) hours prior to the commencement of such work in order to locate all existing utility lines that may be present on the Easement Premises.

- (e) Except for emergency repairs affecting the health and safety of the public, which emergency repairs should be called in within the first 8-hours of entering Grantor's Property and confirmed by Grantor, Grantee shall (in addition to the notice required under subparagraph (c) above) notify Grantor's Regional Right of Way Agent in Oakbrook Terrace, Illinois, telephone number 224-244-1826, at least forty-eight (48) hours in advance of entering Grantor's Property for the performance of any work (including routine maintenance). The timing and scheduling of such work shall be subject to Grantor's prior approval. In the event Grantee is required to perform any emergency repair work affecting the health and safety of the public, Grantee shall notify Grantor in writing of such repair work within forty-eight (48) hours after the performance of such repairs.
- (f) Grantee hereby acknowledges that the Easement Premises may be used from time to time to accommodate equipment and facilities of other persons and/or entities (including, without limitation, pipeline and utility companies) which are (or will be) located on, above or below the surface of the Easement Premises. Grantee agrees that it will contact any such persons and/or entities holding rights to use and/or occupy the Easement Premises, and provide the proper protection required by such persons or entities, in connection with Grantee's use and occupancy of the Easement Premises. Grantee further agrees to furnish Grantor copies of the correspondence between the any such persons or entities and Grantee. Grantee agrees that this requirement shall apply to any installations currently located on, above or below the Easement Premises and any and all future installations on, above or below the Easement Premises.
- (g) Grantor may withhold its approval to the performance of any work hereunder whenever any of the following conditions exist: (i) Grantee is in default under this Easement, (ii) the performance of such work and the use and occupancy of Grantor's Property contemplated by such work in Grantor's judgment will interfere with Grantor's Operations or any other then existing uses of Grantor's Property, or (iii) Grantor and Grantee have failed to enter into such supplemental agreements as Grantor deems necessary or advisable regarding the performance of such work. Grantor retains the right to suspend or stop all such work if in Grantor's sole judgment the ongoing performance of such work endangers Grantor's facilities or threatens to interfere with Grantor's Operations, and Grantor shall incur no liability for any additional cost or expense incurred by Grantee or any third parties in connection with such work stoppage.
- (h) All work shall be performed in a good and workmanlike manner and in accordance with all applicable laws, statutes, building codes and regulations of applicable governmental authorities. Without limiting the generality of the foregoing, Grantee_shall cause all work and the placement of the Easement Premises and the Facilities to meet the applicable requirements of 83 Ill. Admin. Code Part 305, as amended from time to time, and shall cause all workers performing any work on behalf of Grantee, its contractors and subcontractors, to be equipped for and conform to OSHA safety regulations. Upon completion of the work, Grantee shall (i) provide waivers of liens from each contractor and such other evidence of lien-free completion of the work as Landlord may require and (ii) restore all adjacent and other affected areas of Grantor's Property to their original condition preceding the commencement of such work.
- (i) Grantee shall promptly notify Grantor of any damage caused to Grantor's facilities arising our of or related to the performance of such work, including without limitation damage to crops, fences, pasture land or livestock, landscaping and the like and Grantee will reimburse Grantor on demand

for the cost of any such repairs and other expenses incurred by Grantor as a result of such damage. The formula described in Section 15(b) shall be used to determine the amount due Grantor as reimbursement for the cost of such repairs. No vehicles, equipment or anything else (including, but not limited to, any equipment attached to vehicles or equipment such as antennas) having a height which exceeds the maximum allowable height under applicable OSHA height standards in effect from time to time, shall be driven, moved or transported on the Easement Premises without Grantor's prior written consent.

- (j) There shall be no impairment of any natural or installed drainage facilities occasioned by any work related to the Easement Premises and/or the Facilities and Grantee at its cost shall repair and replace all drainage tiles damaged or destroyed during the performance of such work.
- (k) The following additional specific requirements shall apply to the performance of the work related to the Easement Premises and/or the Facilities:
- (i) Grantee agrees that the Facilities will be installed in strict conformity with the plans attached hereto as Exhibit B.
- (ii) Should any proposed changes to the Easement Premises and/or the Facilities be required, either before or after installation, Grantee, or its successors, shall first submit such changes to Grantor, in the form of revised plans for Grantor's review and approval.
- (iii) Where the Facilities cross Grantor's fiber optic cable (TBON), Grantor may require that split plastic duct shall be installed and secured around Grantor's underground fiber optic cables in order to protect the fiber optic cable from any damage during any backfilling operation, all of which shall be performed at Grantee's sole cost and expense.
- (v) Grantee agrees, upon completion of the installation of the Facilities, Grantee will replace all backfilling material in a neat, clean and workmanlike manner, with the topsoil on the surface of Grantor's Property, together with the removal of all excess soils, including any rocks; debris-or unsuitable fill from Grantor's Property that has been displaced by the placement of the Facilities. At Grantor's sole election, Grantor may permit Grantee to evenly spread any portion of the remaining topsoil over the Easement Premises so long as Grantee shall not cause or permit the existing ground grade on the Easement Premises to be increased or decreased in excess of eight (8) inches above or below the existing grade level of the Easement Premises as of the date hereof.
- (vi) Grantee agrees that all of Grantor's Property as affected by the construction of the Facilities shall be leveled, dressed and the area re-seeded using grass over and along Grantee's entire construction project site, except for those areas that are either tenant occupied for agricultural purposes and/or those areas that involve in wetland construction, where governmental wetland restoration requirements shall take precedence. Grantee shall manage the re-seeding process until a firm grass growth has been established on Grantor's Property. Grantee agrees to leave Grantor's Property in a neat, clean and orderly condition and to the satisfaction of Grantor, including, but not limited to, the re-seeding of Grantor's Property as required.
- (vii) Grantee covenants and agrees that, in the event that Grantee installs (or is required (by Grantor or otherwise) to install) any fencing and/or gates in connection with Grantee's work at the Easement Premises (or its use or occupancy of the Easement Premises), Grantee will install, maintain and operate such fences and/or gates in strict compliance with any and all fencing and locking rules, regulations and guidelines which Grantor may deliver to Grantee from time to time.

- (viii) Grantee acknowledges and confirms that, in connection with Grantor's review and/or approval of the plans and specifications for Grantee's work at the Easement Premises (as provided in Subsection 8(a) above), Grantor may require that barricades ("Barricades") be installed on the Easement Premises in order to protect Grantor's Operations and/or other equipment, improvements and facilities of Grantor and other users and occupants of the Easement Premises. Any such Barricades shall be installed either (at Grantor's sole option): (i) by Grantee, at Grantee's sole cost and expense, in a manner satisfactory to Grantor, or (ii) by Grantor, in which event Grantee shall pay to Grantor, prior to such installation, Grantor's reasonable estimate of the cost of such installation of the Barricades.
- 9. <u>Covenants of Grantee</u>. Grantee hereby covenants and agrees as follows (which covenants shall survive the expiration or termination of this Easement and Grantee's rights and privileges under this Easement):
- (a) Grantee shall obtain and maintain all rights, licenses, consents and approvals required from any governmental authorities or third parties with respect to the installation, use or operation of the Easement Premises and/or the Facilities on Grantor's Property and, at Grantor's request, Grantee shall provide Grantor with evidence thereof. Grantee shall cause the Easement Premises and the Facilities to be maintained at all times in good repair and in accordance with all requirements of applicable law, and Grantee shall not permit any nuisances or other unsafe or hazardous conditions to exist in, on or under Grantor's Property in connection with the Easement Premises and/or the Facilities or Grantee's use or occupancy of Grantor's Property. In the event Grantee fails to fully and faithfully perform all such repair and maintenance obligations, Grantor shall have right (but not the obligation) after thirty (30) days' written notice to Grantee, to cause such repairs and maintenance to be performed and charge the cost thereof to Grantor. In the event Grantor elects to perform such repair and maintenance, the amount due Grantor from Grantee as reimbursement shall be determined using the formula described in Section 15(b) hereof.
- (b) Grantee shall install the Facilities and use and occupy the Easement Premises in a manner that avoids any interference with Grantor's Operations. Within fifteen (15) days after Grantor's demand therefor, Grantee shall reimburse Grantor for all costs incurred by Grantor as a result of injury or damage to persons, property or business, including without limitation the cost of repairing any damage to Grantor's equipment or facilities or costs arising from electrical outages, caused by the use and occupancy of the Easement Premises by Grantee, its representatives, employees, agents, contractors, subcontractors and invitees.
- (c) Grantee hereby covenants and agrees that it will not cause or permit any lien (including, without limitation, any mechanic's lien) or claim for lien to be asserted against the Easement Premises or any interest therein, whether such lien or claim for lien results from or arises out of any act or omission of Grantee or its employees, agents, consultants, representatives, contractors, subcontractors or materialmen, or otherwise.—In the event any such lien or claim for lien is filed, Grantee_will immediately pay and release the same. In the event such lien or claim of lien is not released and removed within five (5) days after notice from Grantor, Grantor, at its sole option and in addition to any of its other rights and remedies, may take any and all action necessary to release and remove such lien or claim of lien (it being agreed by Grantee that Grantor shall have no duty to investigate the validity thereof), and Grantee shall promptly upon notice thereof reimburse Grantor for all sums, costs and expenses, including court costs and reasonable attorneys' fees and expenses, incurred by Grantor in connection with such lien or claim of lien. Grantee hereby agrees to indemnify, defend and hold harmless Grantor from and against any and all liens or claims for lien arising out of or in any way connected with Grantee's use and occupancy of the Easement Premises.

- (d) In addition to, and not in lieu of, the other payments which Grantee is required to make under this Easement, Grantee shall pay the following amounts to Grantor in respect of real estate taxes and assessments, in each case no later than thirty (30) days after Grantor's written demand therefor:
- (i) All real estate taxes and other assessments which are allocable to any improvements, structures or fixtures constructed, installed, or placed by Grantee at the Easement Premises for all periods during which this Easement is in effect, plus
- (ii) Any increase in the real estate taxes and other assessments payable with respect to the Easement Premises (or any tax parcel of which the Easement Premises is a part) which is allocable to this Easement, Grantee's use or occupancy of the Easement Premises, or any improvements, structures or fixtures constructed, installed or placed by Grantee at the Easement Premises (but without duplication of any amount payable pursuant to clause (a) above), for all periods during which this Easement is in effect.

For purposes of this Easement real estate taxes or assessments "for" or "with respect to" any particular period (or portion thereof) shall mean the real estate taxes or assessments which accrue with respect to such period, irrespective of the fact that such taxes or assessments may be due and payable within a different period.

Grantee hereby covenants and agrees that Grantee shall, no later than the "Tax Exemption Date" (as hereinafter defined), at Grantee's sole cost and expense, execute and deliver all documents, instruments petitions and applications, and take all other actions which may be necessary and/or appropriate, in order to cause the Easement Premises to be exempted from the payment of real estate taxes, to the extent that it is possible, under applicable law. In the event that Grantee is successful in obtaining any such real estate tax exemption for the Easement Premises, then Grantee shall thereafter cause such real estate tax exemption to be continued for each tax year (or portion thereof) during which this Easement is in effect (and Grantee shall execute such documents, instruments, petitions and applications, and take such other actions which may be necessary and/or appropriate, to cause such property tax exemption to be so continued). In the event that Grantee is unsuccessful in obtaining or continuing any such real estate tax exemption with respect to the Easement Premises, then Grantee shall thereafter use commercially reasonable efforts to continue to seek such exemption (or continuance thereof, as applicable) and shall, from time to time if Grantor so requests, take such actions as may be necessary to apply for such exemption (or continuation). For purposes hereof, the term "Tax Exemption Date" shall mean the date that is the earlier of: (i) sixty (60) days after the date of this Easement, or (ii) the deadline for submitting a real estate tax exemption petition or application for the real estate taxes for the year in which this Easement is executed and delivered.

- (e) Grantee shall notify Grantor in writing within thirty (30) days after the date Grantee ceases to use the Easement Premises and/or the Facilities and shall provide Grantor with a properly executed release of this Easement.
- 10. General Indemnity. To the maximum extent permitted under applicable law, Grantee agrees to protect, indemnify, defend (with counsel acceptable to Grantor) and hold harmless Grantor and Exelon Corporation, and their respective parents, subsidiaries and affiliates, and their respective officers, directors, shareholders, employees, representatives, agents, contractors, licensees, lessees, guests, invitees, successors and assigns (collectively, the "Indemnified Parties") from and against any and all losses, costs, damages, liabilities, expenses (including, without limitation, reasonable attorneys' fees) and/or injuries (including, without limitation, damage to property and/or personal injuries) suffered or incurred by any of the Indemnified Parties (regardless of whether contingent, direct, consequential, liquidated or unliquidated) (collectively, "Losses"), and any and all claims, demands, suits and causes of action brought or raised against any of the Indemnified Parties (collectively, "Claims"), arising out of,

resulting from, relating to or connected with: (i) any act or omission of Grantee or its officers, directors, shareholders, employees, representatives, agents, contractors, licensees, lessees, guests, invitees, successors and assigns ("Grantee Parties") at, on or about Grantor's Property, and/or (ii) any breach or violation of this Easement on the part of Grantee, and notwithstanding anything to the contrary in this Easement, such obligation to indemnify and hold harmless the Indemnified Parties shall survive any termination of this Easement. This indemnification shall include, but not be limited to, claims made under any workman's compensation law or under any plan for employee's disability and death benefits (including without limitation claims and demands that may be asserted by employees, agents, contractors and subcontractors).

- 11. <u>Waiver</u>. Any entry onto Grantor's Property by Grantee Parties shall be at such parties' sole risk, and Grantor makes (and has heretofore made) no representations or warranties of any kind whatsoever regarding Grantor's Property or the condition of Grantor's Property (including, without limitation, the environmental condition thereof). To the fullest extent permitted under applicable law, each of Grantee Parties hereby waives any and all claims, demands, suits and causes of action against the Indemnified Parties, and fully and forever release the Indemnified Parties, for any loss, cost, damage, liability or expense (including, without limitation attorneys' fees) suffered or incurred by such Grantee Parties in connection with any entry onto Grantor's Property pursuant to this Easement. This Section will survive termination of this Easement.
- 12. <u>Insurance</u>. During any period when installation, construction, maintenance or repair work is performed at the Easement Area, Grantee agrees to purchase and maintain (or to cause its contractors to purchase and maintain), at its sole cost and expense, a policy or policies of insurance issued by insurance companies authorized to do business in the State of Illinois and in a form reasonably satisfactory to Grantor as follows:

COVERAGE #1

Workers' Compensation Insurance Policy: Coverage A - To pay promptly when due all compensation and other benefits required of the insured by the workers' compensation law. Coverage B - Employers' Liability: To pay on behalf of the insured with limits not less than One Million and No/100 dollars (\$1,000,000.00) each accident/occurrence all sums which the insured shall become legally obligated to pay as damages because of bodily injury by accident or disease, including death at any time resulting therefrom. Coverage A and Coverage B will cover all contractors, subcontractors, and their subcontractors.

COVERAGE #2

Comprehensive General Liability Policy or Policies (with coverage consistent with ISO CG 0001 (10/98)) covering all contractors, subcontractors and all their subcontractors with limits not less than the combined single limit of Four Million and No/100 Dollars (\$4,000,000.00) for bodily injuries to or death of one (1) or more persons and/or property damage sustained by one (1) or more organizations as a result of any one (1) occurrence, which policy or policies shall not exclude property of Grantor. Grantor shall be added as an Additional Insured under endorsement GL 2010. Bodily injury means bodily injury, sickness, or disease sustained by any person which occurs during the policy period, including death, at any time resulting therefrom. Property damage means (1) physical injury to or destruction of tangible property which occurs during the policy period, including the loss of use thereof at any time resulting therefrom, or (2) loss of use of

tangible property which has not been physically injured or destroyed provided such loss of use is caused by an occurrence during the policy period.

Grantee will, in any event, purchase and maintain during the Term hereof:

COVERAGE #3

- (i) Owners', Landlords' and Tenants' Liability Insurance Policy in the name of Grantor as the insured, with limits of not less than the combined single limit of Four Million and No/100 Dollars (\$4,000,000.00) for bodily injuries to or death of one or more persons and/or property damage sustained by one or more organizations as a result of any one occurrence, which policy shall not exclude property of Grantor. Bodily injury means bodily injury, sickness, or disease sustained by any person which occurs during the policy period, including death, at any time resulting therefrom. Property damage means (1) physical injury to or destruction of tangible property which occurs during the policy period, including the loss of use thereof at any time resulting therefrom, or (2) loss of use of tangible property which has not been physically injured or destroyed provided such loss of use is caused by an occurrence during the policy period.
- (ii) As an alternative to the Owners', Landlords' and Tenants' Liability Insurance described above, Grantee may purchase and provide a rider or an endorsement to its existing commercial general liability policy or policies of insurance naming Grantor as an additional insured thereunder, Endorsement GL 2010 or CG 2010, including coverage extensions for premises/products/ completed operations and contractual liability for Grantee's indemnity obligations hereunder; provided that the limits and coverages in this alternative form of insurance are equal to or greater than the limits and coverages specified above for the Owners', Landlords' and Tenants'—Liability Insurance Policy described above.
- (iii) Automobile Liability in an amount of not less than \$1,000,000 per occurrence combined single limit for bodily injury and property damage, covering all owned, leased, rented or non-owned vehicles, which shall include automobile contractual liability coverage.

Grantee may substitute lower limits for any of the policies listed above, provided that Grantee maintains an umbrella or excess liability policy or policies which provide a total minimum limit of \$1,000,000.00 for automobile liability and \$4,000,000.00 for general liability, and that all other requirements of this insurance clause are satisfied by such umbrella or excess policy or policies.

There shall be furnished to Grantor, prior to commencing the work above described a certificate of insurance showing the issuance of insurance policies pursuant to the requirements contained in Coverages #1 and #2 of this paragraph. Insurance coverage as required herein shall be kept in force until all work has been completed.

A certificate of insurance showing the issuance of the insurance policies required under Coverage #3 shall be delivered to Grantor upon execution of this Easement. The insurance under Coverage #3 shall be kept in force through the Term hereof through the above-referred policy, or such subsequent or substitute policy or policies as Grantee may, at its discretion, obtain.

13. Environmental Protection.

- (a) Grantee covenants and agrees that Grantee shall conduct its operations on the Easement Premises in compliance with all applicable Environmental Laws (as hereinafter defined) and further covenants that neither Grantee, nor any of Grantee Parties, shall use, bring upon, transport, store, keep or cause or allow the discharge, spill or release (or allow a threatened release) in each case of any Hazardous Substances (as hereinafter defined) in, on, under or from the Easement Premises. Without limiting any other indemnification obligations of Grantee contained herein, Grantee hereby agrees to protect, indemnify, defend (with counsel acceptable to Grantor) and hold harmless the Indemnified Parties from and against any and all Losses and Claims (including, without limitation, (i) reasonable attorneys' fees, (ii) liability to third parties for toxic torts and/or personal injury claims, (iii) fines, penalties and/or assessments levied, assessed or asserted by any governmental authority or court, and (iv) assessment, remediation and mitigation costs and expenses and natural resource damage claims) arising out of, resulting from or connected with any Hazardous Substances used, brought upon, transported, stored, kept, discharged, spilled or released by any Grantee Parties or any other person or entity (except for any person or entity which is an Indemnified Party) in, on, under or from the Easement Premises. For purposes of this Easement, the term "Hazardous Substances" shall mean all toxic or hazardous substances, materials or waste, petroleum or petroleum products, petroleum additives or constituents or any other waste, contaminant or pollutant regulated under or for which liability may be imposed by any Environmental "Environmental Laws" shall mean all federal, provincial, state and local environmental laws (including common law) regulating or imposing standards of care with respect to the handling, storage, use, emitting, discharge, disposal or other release of Hazardous Substances, including, but not limited to, the Resource Conservation and Recovery Act, 42 U.S.C. §§ 6901, et seq., the Clean Air Act, 42 U.S.C. §§7401, et seq., the Federal Water Pollution Control Act, 33 U.S.C. §§1251, et seq., the Emergency Planning and Community Right to Know Act, 42 U.S.C. §§ 1101, et seq., the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. §§ 9601, et seq., the Toxic Substances Control Act, 15 U.S.C. §§2601, et seq., the Oil Pollution Control Act, 33 U.S.C. §§2701, et seq., any successor statutes to the foregoing, or any other comparable local, state or federal statute, ordinance or common law pertaining to protection of human-health, the environment or natural resources, including without limitation the preservation of wetlands, and all regulations pertaining thereto, as well as applicable judicial or administrative decrees, orders or decisions, authorizations or permits.
- (b) If there are wetlands on the Easement Premises, or if wetlands should develop on the Easement Premises during the term of this Easement, Grantee shall strictly comply with and observe all applicable Environmental Laws. At Grantor's request, Grantee, at its cost, shall furnish Grantor with a survey of the Easement Premises delineating any wetland areas located on the Easement Premises. Under no circumstances shall Grantee change the physical characteristics of any wetland areas located on the Easement Premises or any adjoining land or place any fill material on any portion of the Easement Premises or adjoining land, without in each instance-obtaining Grantor's prior written consent (which may be granted or withheld in Grantor's sole discretion), and only then in compliance with applicable Environmental Laws.
- (c) Grantee shall provide Grantor with prompt written notice upon Grantee's obtaining knowledge of any potential or known release or threat of release of any Hazardous Substances affecting the Easement Premises.
 - (d) This Section shall survive the expiration or other termination of the Easement.
- 14. <u>Defaults</u>. The occurrence of any of the following shall constitute an event of default ("Event of Default") under this Easement:

- (a) Grantee shall fail to pay when due any amount payable to Grantee hereunder and such failure continues for a period of ten (10) days after notice thereof from Grantor; or
- (b) Grantee shall breach or violate any of its duties or obligations set forth in Section 9(c) or Section 12 of this Easement; or
- (c) Grantee shall at any time be in default in any other covenants and conditions of this Easement to be kept, observed and performed by Grantee and such default continue for more than thirty (30) days (or such shorter time period as may specifically set forth in this Easement) after notice from Grantor; or
- (d) A receiver, assignee or trustee shall be appointed for Grantee or if the Grantee shall file bankruptcy, or if involuntary bankruptcy proceedings shall be filed against Grantee; or
- (e) Grant shall fail to complete construction of the Facilities on or before six (6) months after the date of this Easement or shall fail to operate or maintain the Facilities for a period of twelve (12) consecutive months.
- 15. Remedies. Upon the occurrence of an Event of Default, Grantor may exercise any one or more of the following remedies (which remedies shall survive the expiration or termination of this Easement and Grantee's rights and privileges under this Easement):
- (a) terminate this Easement and all rights and privileges of Grantee under this Easement by written notice to Grantee; or
- (b) take any and all corrective actions Grantor deems necessary or appropriate to cure such default and charge the cost thereof to Grantee, together with (i) interest thereon at the rate of nine (9%) percent and (ii) an administrative charge in an amount equal to ten percent (10%) of the cost of the corrective action to defray part of the administrative expense incurred by Grantor in administering such cure, such payment to be made by Grantee upon Grantor's presentment of demand therefor; or
- (c) any other remedy available at law or in equity to Grantor, including without limitation specific performance of Grantee's obligations hereunder. Grantee shall be liable for and shall reimburse Grantor upon demand for all reasonable attorney's fees and costs incurred by Grantor in enforcing Grantee's obligations under this Easement, whether or not Grantor files legal proceedings in connection therewith. No delay or omission of Grantor to exercise any right or power arising from any default shall impair any such right or power or be construed to be a waiver of any such default or any acquiescence therein. No waiver of any breach of any of the covenants of this Easement shall be construed, taken or held to be a waiver of any-other breach, or as a waiver, acquiescence in or consent to any further or succeeding breach of the same covenant. The acceptance of payment by Grantor of any of the fees or charges set forth in this Easement shall not constitute a waiver of any breach or violation of the terms or conditions of this Easement.
- 16. <u>Notices</u>. Whenever notice is required to be given pursuant to this Easement, the same shall be in writing, and either personally delivered, sent by a nationally recognized overnight delivery service, postage prepaid, or sent via United States certified mail, return receipt requested, postage prepaid, and addressed to the parties at their respective addresses as follows:

If to Grantor:

Commonwealth Edison Company P.O. Box 767 Chicago, Illinois 60690-0767 Attn: Director of Real Estate Services

with a copy to:

Exelon Business Services Company
Law Department
P.O. Box 805379
Chicago, Illinois 60680-5379
Attn: Assistant General Counsel – Real Estate

If to Grantee:

United City of Yorkville 800 Game Farm Road Yorkville, IL 60560 Attn: Public Works

or at such other addresses as any party, by written notice in the manner specified above to the other party hereto, may designate from time to time. Unless otherwise specified to the contrary in this Easement, all notices shall be deemed to have been given upon receipt (or refusal of receipt) thereof.

(i)

- 17. No Assignment by Grantee. This Easement and the rights and obligations of the parties hereto shall be binding upon and inure to the benefit of the parties and their respective successors, personal representatives and assigns and the owners of Grantee's Property and Grantor's Property, from time to time; provided, however, that Grantee shall have no right to assign all or any portion of its right, title, interest or obligation in this Easement or under this Easement without the prior written consent of Grantor, which consent may be granted or withheld by Grantor in its sole and exclusive discretion. Any attempt by Grantee to assign all or any portion of its interest hereunder in violation of the foregoing shall be void and of no force and effect. The terms "Grantor" and "Grantee" as used herein are intended to include the parties and their respective legal representatives, successors and assigns (as to Grantee such assigns being limited to its permitted assigns), and the owners of Grantor's Property and Grantee's Property, from time to time. For purposes of this Easement, any transfer, directly, indirectly or by operation of law, of a "controlling" interest in Grantee shall constitute an assignment of this Easement, and shall be-subject to the terms and provisions of this Section 17. For purposes hereof, a "controlling" interest in Grantee shall mean: (a) the ownership, directly or indirectly, of a majority of the outstanding voting stock or interests of Grantee, or (b) the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of Grantee, whether through the ownership of voting securities or other ownership interests, by statute, or by contract.
- 18. <u>Entire Agreement</u>. This Easement, the exhibits and addenda, if any, contain the entire agreement between Grantor and Grantee regarding the subject matter hereof, and fully supersede all prior written or oral agreements and understandings between the parties pertaining to such subject matter.

- 19. <u>Transfer by Grantor.</u> Upon any transfer or conveyance of the Easement Premises by Grantor, the transferor shall be released from any liability under this Easement, and the transferee shall be bound by and deemed to have assumed the obligations of Grantor arising after the date of such transfer or conveyance.
- 20. <u>No Oral Change</u>. This Easement cannot be changed orally or by course of conduct, and no executory agreement, oral agreement or course of conduct shall be effective to waive, change, modify or discharge it in whole or in part unless the same is in writing and is signed by the party against whom enforcement of any waiver, change, modification or discharge is sought.
- 21. <u>Further Assurances</u>. Each party agrees that it will execute and deliver such other documents and take such other action as may be reasonably requested by the other party to effectuate the purposes and intention of this Easement.
- 22. Governing Law, Venue. The terms and provisions of this Easement shall be governed by and construed in accordance with the laws of the State of Illinois. With respect to any suit, action or proceeding relating to this Easement (each a "Proceeding"), the parties hereto each irrevocably: (a) agree that any such Proceeding shall be commenced, brought, tried, litigated and consummated in the courts of the State of Illinois located in the County of Cook or (as applicable) the United States District Court for the Northern District of Illinois, (b) submit to the exclusive jurisdiction of the courts of the State of Illinois located in the County of Cook and the United States District Court for the Northern District of Illinois, and (c) waive any objection which they may have at any time to the laying of venue of any Proceeding brought in any such court, waive any claim that any Proceeding brought in any such court has been brought in an inconvenient forum, and further waive the right to object, with respect to such Proceeding, that any such court does not have jurisdiction over such party.
- 23. <u>Time is of the Essence</u>. Time is of the essence of each and every provision of this Easement.
- 24. <u>Severability</u>. In the event that any governmental or regulatory body or any court of competent jurisdiction determines that any covenant, term or condition of this Easement as applied to any particular facts or circumstances is wholly or partially invalid, illegal or unenforceable, such invalidity, illegality or unenforceability shall not affect such covenant, term or condition as applied to other facts or circumstances (unless the effect of such determination precludes the application of such covenant, term or condition to other facts or circumstances) or the validity, legality or enforceability of the other covenants, terms and conditions of this Easement. In the event any provision of this Easement is held to be invalid, illegal or unenforceable, the parties shall promptly and in good faith negotiate new provisions in substitution therefor to restore this Easement to its original intent and effect.
- 25. <u>No Reinstatement</u>. No receipt of money by Grantor from Grantee, after the expiration or termination of this Easement shall renew, reinstate, continue or extend the term of this Easement.
- 26. <u>Non-Affiliated</u>. By signing this Easement, Grantee affirms and states that it is not an employee of Commonwealth Edison Company nor Exelon Corporation, and their respective parents, subsidiaries and affiliates, nor has any affiliated interest in the Commonwealth Edison Company or Exelon Corporation, and their respective parents, subsidiaries and affiliates.
- 27. <u>Counterparts</u>. This Easement may be executed by the parties in counterparts. Each such counterpart shall be deemed an original and all such counterparts, taken together, shall constitute one and the same agreement.

- 28. <u>No Assessment</u>. By signing this Easement Grantee agrees that Grantor or its public utility successor shall not be assessed for any improvements to be constructed pursuant hereto as a local improvement project or otherwise charged for the cost of such improvements.
- 29. <u>No Third Party Beneficiaries</u>. Grantor and Grantee agree and acknowledge that, except as expressly set forth herein, there are no intended third party beneficiaries of this Easement nor any of the rights and privileges conferred herein.
- 30. <u>Illinois Commerce Commission Approval.</u> Grantor and Grantee acknowledge that Grantor is a public utility regulated by the Illinois Commerce Commission ("Commission") and other governmental authorities, and this Easement and the obligations of the parties hereto are subject to all legal requirements applicable to Grantor as a public utility. Although it is not expected that the Commission's or other governmental authority's approval will be required for this Easement, the rights and obligations of the parties hereunder are conditioned upon the Commission's and any other applicable governmental authority's approval of this Easement, under any circumstances in which such approval is required. It is further agreed and understood that this Easement may be terminated by Grantor immediately at any time in the event that Grantor is required to do so by the Commission or some other governmental authority.
- 31. <u>Labor Relations</u>. Neither Grantee nor any of Grantee's authorized agents shall, at any time, directly or indirectly, employ, or permit the employment of, any contractor, mechanic or laborer in the Easement Premises, or permit any materials to be delivered to or used in the Easement Premises, if, in Grantor's sole judgment, such employment, delivery or use will interfere or cause any conflict with other contractors, mechanics or laborers engaged in the construction, maintenance or operation of Grantor's Property (or any other property) by Grantor, Grantee or others, or the use and enjoyment of Grantor's Property by Grantor or other lessees or occupants of Grantor's Property. In the event of such interference or conflict, upon Grantor's request, Grantee shall cause all contractors, mechanics or laborers causing such interference or conflict to leave Grantor's Property immediately.
- 32. <u>Independent System Operator.</u> In the event responsibility for management or operation of all or any portion of Grantor's electrical transmission facilities located in or on the Grantor's Property is transferred or assigned by Grantor to an independent system operator ("ISO") or another third party, then Grantee agrees to recognize the right of such ISO or third party to exercise all or any part of Grantor's rights under this instrument.

IN WITNESS WHEREOF, the parties hereto have caused this Easement to be executed by their proper officers thereunto duly authorized as of the day and year first hereinabove written.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Erin Willrett, Assistant City Administrator Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: August 6, 2018

Subject: Re-Piping of Existing Water Main and Demolition of Well #3 Building

Bids were received, opened and tabulated for work to be done on the Re-Piping of Existing Water Main and Demolition of Well #3 Building at 10:00 a.m. on July 31, 2018. Representatives of contractors bidding the project, the City, and our firm were in attendance. A tabulation of the bids and the engineer's estimate is attached for your information and record. The low bid was below our engineer's estimate.

We recommend the acceptance of the bid and approval of the contract award be made to the low bidder, Performance Construction and Engineering, Inc., 217 West John Street, Plano, IL 60545 in the amount of \$118,800.00.

If you have any questions or require additional information, please let us know.

Memorandum

To: Public Works Committee

From: Eric Dhuse, Director of Public Works

CC: Bart Olson, Administrator

Date: August 9, 2018 Subject: Spring St. Parking

Summary

I am proposing to create a no parking area on West Spring St. from Rt. 47 to Church St. on the south side of the street only. Parking would still be allowed on the north side of the street.

Background

West Spring Street is approximately 280' long and 18.5' wide. On this street are 4 driveways, 2 on the north side that are relatively narrow and 2 on the south that are very wide in comparison. With the road only being 18.5' wide in most of the parking areas, it is impossible to park on both sides of the street and have cars travel down the roadway.

It has been brought to my attention that parking problems on this street have become a fairly common issue due to the street's proximity to Parkview School, Town Square and Chapel on the Green. The resident that lives on the corner of Church and W. Spring has had instances where cars park on her yard because the road is so narrow, and other instances where cars actually block the driveway when parking for an event. In addition to the resident complaint, there is a real safety issue to consider. If cars are parked on both sides of this street, an emergency vehicle could not get down this street if needed.

I have asked for the input of our Engineers and our Police Department as well. Both departments agree that parking should be eliminated on the south side of the street to create a better traffic flow and allow for emergency vehicle access at all times.

By creating this no parking zone, we would lose 5 parking spaces that are currently utilized when needed.

Recommendation

I recommend that City create a no parking zone on the south side of W. Spring St. from N. Bridge St. to Church St.

I would ask that this be placed on the August 21, 2018 Public Works Committee meeting for discussion. If you have any questions or need further information, please let me know.

| Ordinance No. 2018- |
|---------------------|
|---------------------|

AN ORDINANCE AMENDING THE CODE OF ORDINANCES OF THE UNITED CITY OF YORKVILLE, KENDALL COUNTY, ILLINOIS REGULATING ON-STREET PARKING

NOW THEREFORE, BE IT ORDAINED by the Mayor and City Council of the United City of Yorkville, Kendall County, Illinois, as follows:

Section 1. Title 6, Chapter 2, Section 2, of the United City of Yorkville Code of Ordinances is hereby amended by adding the following:

6-2-2: PARKING PROHIBITED ON DESIGNATED STREETS:

SPRING STREET

A "no parking" zone shall be created on the south side of W. Spring Street from Bridge Street (Route 47) to Church Street.

Section 2. If any Section, subsection, sentence, clause, phrase or portion of this Chapter is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct, and independent provision, and such holding shall not affect the validity of the remaining portions hereof.

Section 3. This Ordinance shall be in full force and effect upon its passage, approval, and publication as provided by law.

Date: August 9, 2018

Subject: Sidewalk Program Review

Summary

A brief overview of our past and present sidewalk replacement program as asked for by Alderman Frieders.

Background

The City has had many different sidewalk maintenance and replacement programs throughout the years. When I started in the mid 1990's there was no program at all. Sidewalks were replaced only when we had to remove them to repair infrastructure. There simply was no money, and at that time, no stringent rules that compel the city to remove or replace sidewalk. Sidewalk was added when new developments were constructed, and I am sure that there were instances where walks were connected to create contiguity, but I cannot think of one offhand.

When the housing boom hit in the early 2000's, new sidewalk was constructed with every new home and business. At this time, we started the 50/50 replacement program for residents that wanted to share the cost of replacing the public walk along their property. Some years we would have to close the program due to so much interest, and other years we would have almost all the funds budgeted left in the fund at the end of the year.

As the housing recession hit in 2007, we stopped all of the 50/50 program, and any non-emergency replacement all together. This lasted for approximately 5 years, but then the city shifted direction again and let the PW department pick longer stretches of sidewalk, usually a block or so, and remove and replace the entire walk to remove trip hazards, fill in gaps, and make the sidewalk much more usable and safe. This went on until approximately 2 years ago when the housing started picking up so we became much busier, and the price of concrete continued to rise. This combination forced us to rethink how we were going to repair and replace sidewalk with limited time and funding.

Currently, we rent a concrete grinder for one week, twice per year, to remove smaller trip hazards without removing and replacing the sidewalk. In addition, we do replace approximately \$3000-\$5000 worth of sidewalk per year. This equates to between 60-100 linear feet of sidewalk replacement and is strictly the worst of the worst that we cannot grind or fix with other methods.

In addition to the work PW completes, sidewalk replacement is performed on all Road to Better Roads program work. This is mostly work to comply with the ever changing ADA standards, but we also remove and replace serious trip hazards when possible.

To my knowledge, we have never performed, nor commissioned a formal city wide sidewalk condition report. Public Works does have a list of areas that do not have sidewalk that I have attached for reference. This list was created to be a starting point only. It shows areas where there is no walk, but it does not tell the whole story. For instance, it does not say that in most cases there is sidewalk on the other side of the street, but that sidewalk is in poor to very poor condition. In addition, it does not tell us that the missing sidewalk on Colton St. between

Somonauk and Spring St. would be within 10' of the front of homes if it were constructed in the normal location. It is my intention to work with the Community Development department to come up with an atlas type map that would allow us to go house by house to assess the sidewalk length, condition, and replacement or installation costs. This will also give us a chance to look at it in person and see if there are any other irregularities such as distance to the homes, trees that are planted where the walk needs to go, parking areas that would be affected, potential drainage or grading issues or other details that aerial views would not show. At this time, I do not have a time frame for these inspections, but I would envision this as winter work if there is no snow on the ground.

Recommendation

Informational item only

Missing Walk North side

830' south side of Center 47/Liberty

60' north side of Center near Liberty

900' south side of Park 47/Liberty

Memorandum

To: City Council

From: Bart Olson, City Administrator

CC:

Date: August 15, 2018

Subject: CMAP Water Governance Report

Summary

Review of a CMAP-commissioned report outlining available water governance options for a joint Oswego-Montgomery-Yorkville (OMY) water plant.

Background

This item was last discussed by the City Council in Spring 2018. At that time, the City Council approved participation in a grant application for a CMAP-funded study of water governance options. The City was successful in that grant application, and the study was completed in Summer 2018. The full study is attached.

For ease of use, I have also included Oswego's Village Board memo on the topic, which nicely summarizes the 5 governance options. Options 3, 4 and 5, (wholesale water service, public-private partnership, and full-scale privatization) are relatively straightforward. As a wholesale water service, Yorkville could own a water system and sell water to any other municipality. As a public-private partnership, we would partner with any number of for-profit organizations to construct or operate a water system. As a full privatization, the City would allow a company like Illinois American Water to construct and operate the system. In the full privatization option, the City would have no control over water improvements and rate increases; those projects would instead be governed under ICC rules.

Options 1 and 2, commission form and JAWA form, are more complex. While Oswego's memo states that we are not eligible for a commission form, that is under review. A very succinct chart of the difference between a commission and a JAWA is included on page 14 of the report:

| Comparing Water Commissions and Joint Action Water Agencies | | | | | |
|---|-----------------|------------------------------|------------------|---|--|
| Governance Type | County Involved | Borrow money and issue bonds | Taxing authority | Governing members must be elected officials | |
| Municipal Joint Action Water Agency | × | | | | |
| Water Commission | | 1 | 1 | X | |

Recommendation

While all three municipalities will be revisiting these options as we decide whether to proceed forward with Lake Michigan or Fox River water as a long term water source, it would be helpful to get some early feedback from the City Council as to whether certain options are more or less attractive.

DEPARTMENT: Public Works

SUBMITTED BY: Public Works Director/Village Engineer Jennifer M. Hughes, P.E., CFM

FISCAL IMPACT:

None

BACKGROUND:

The Villages of Oswego and Montgomery along with the United City of Yorkville are considering the construction of a water plant to serve all three communities. There are many forms of governance for the operation of the plant. The municipalities applied and were awarded a Local Technical Assistance grant from the Chicago Metropolitan Agency for Planning to conduct a study of governance options. CMAP is receiving funding from IEPA to use our group as a case study for other communities who face similar issues. CMAP subcontracted with the Metropolitan Planning Council to prepare the report.

DISCUSSION:

In its report entitled "Shared Drinking Water Service: A Summary Report on Available Governance Structures", MPC identified five governance models within the State of Illinois.

- Water Commissions: Commissions are countywide governmental bodies established under the Illinois Water Commission Act of 1985 (70 ILCS 3720). This form of governance is not viable for operation of our own plant without a change in state law due to population requirements. However, we are not precluded from joining the <u>DuPage</u> Water Commission to obtain Lake Michigan water. A Commission form of governance requires that the County Board be represented in the government structure.
- 2. <u>Municipal Joint Action Water Agency (JAWA)</u>: Two or more communities may operate a joint waterworks under the Illinois Municipal Code's provisions for Joint Acquisition and Operation of Water Supply and Waterworks (65 ILCS 5/11 135). This option allows Oswego, Yorkville, and Montgomery to form a new agency to construct, maintain, and operate a new water plant. It spreads the financial risk across the communities.
- 3. Wholesale Water Service: Under this model, one community would own the system and the other communities would become wholesale customers under a long-term contract. The host community is fiscally responsible for ensuring the water meeting all regulatory requirements and thus would be responsible for setting rates subject to the terms of the contract(s).
- 4. **Public-Private Partnerships**: Municipalities may contract with private entities to construct, maintain, or operate the waterworks systems. The municipalities continue to own the system in whole or in part. The PPP model can be applied to a JAWA or Wholesale Water Service model.
- **5.** <u>Privatization</u>: Communities could choose to get out of the water business altogether and allow a private entity to own, maintain, and operate the waterworks system.

RECOMMENDATION:

We will revisit these options again as part of the selection of a new water source. If there are any questions regarding the governance structures, please inform staff.

Introduction

In the United States, there are over 151,000 public water systems in operation¹. Most public water systems are owned by the municipality they serve, a regional consortium of communities or by a private company. These systems are responsible for everything from ensuring enough supply, to water-quality monitoring and treatment, to service operations and infrastructure maintenance, to ensuring regulatory compliance. Public water systems deliver a public service and charge a fee for this service in much the same way as energy or telecommunication utilities.²

The practice of shared services across municipal boundaries continues to gain traction as municipalities grapple with rising costs. Drinking water service is one such option municipalities can explore. Water resources are not bound by political or utility boundaries, so cooperation across and within municipal, county and state lines, can help facilitate a more sustainable and comprehensive approach to drinking water management.

A shared service model also provides an opportunity to save money. The cost to provide safe and viable drinking water for our communities will only continue to increase. These cost increases can be driven by any number of factors including resource depletion, pollution, infrastructure investment needs, labor costs, population growth and land use practices. Neighboring small and midsize municipalities in the United States are forging service partnerships to achieve economies of scale and mitigate these rising costs. By joining forces, shared service models also provide an opportunity for communities to save money by identifying and minimizing redundant services, supplies and labor costs—all while helping to ensure public health, continuous supply and better stewardship of water resources.

Municipalities and industries have long adopted regionalized approaches to utility services. Government and public service agencies have used this approach in energy, telecommunications and, more recently, in water services. Drivers for a shared services approach vary as each community or region experiences its own, unique pressures—be they financial (deteriorating infrastructure, changes in demand, regulatory compliance), social (justice or equity issues) or environmental (resource availability and/or stewardship). The structure of a shared service model can also vary in how that service is governed and provided. Because these motivations, circumstances and governance structures vary, it is essential for communities to 1) clearly identify the issues motivating action, and 2) judiciously explore the most appropriate water governance structure, so that the shared service model selected is best suited to the needs of the communities involved. The types of information and decisions communities should have in place before considering different governance options is provided in the General Considerations section of this report.

The purpose of this report is to outline various water governance options available in Illinois for shared drinking water service between municipalities. This summary report was requested by three municipalities in Northeastern Illinois (Oswego, Montgomery and Yorkville) currently considering a shared service arrangement for drinking water delivery. Appendix A of this report provides a community profile of these municipalities. However, the water governance structures and considerations provided in this summary report can assist other municipalities, particularly in Illinois, in considering the benefits of regionalized drinking water service for their communities.

¹ United States Environmental Protection Agency. *Information about Public Water Systems*. Washington DC. 2017.

² Metropolitan Planning Council. *Drinking Water 1-2-3.* Chicago, IL 2017.

Community Profile: Oswego, Montgomery and Yorkville, Illinois

The Villages of Oswego and Montgomery, and the United City of Yorkville already have a cooperative relationship, and a history of working together on shared services, staff and equipment under an Intergovernmental Shared Services (ISS) agreement as well as an Intergovernmental Agreement for Illinois Public Works Mutual Aid Network (IPWMAN).³

The communities are facing water supply constraints due to significant depletion of groundwater resources in their region, and have been investigating new, sustainable water supply options. Given the overall costs and risks associated with needing to identify and buildout a new water supply source, these municipalities have been exploring the potential for a shared service model to capitalize on economies of scale and resource sustainability.

While the following report summarizes a high-level understanding of some of the available water governance structures for regionalized drinking water service, further analysis and legal counsel would be required to fully understand what option best supports a particular group of communities.

Governance Models

As mentioned previously, there are a variety of configurations in structure and administration for how municipalities can and have approached shared governance related to drinking water service. This report outlines five particular categories of water governance:

- Water Commissions
- Municipal Joint Action Water Agencies (JAWAs)
- Wholesale Water Service
- Public-Private Partnerships
- Privatization

The following sub-sections outline the basic structure, legal and governing requirements, voting rights, fiscal power, examples and important considerations for each of these five categories.

For the purposes of this report, 'water governance' is the organizational and administrative processes through which decisions about water supply service and oversight are made and implemented. It also includes a description of the ownership, organizational structure and allocation of responsibilities for operational management.

³ Hoppenstedt, T. (n.d.). Shared Services IGA. Retrieved from Village of Montgomery: http://drscw.org/wp/wp-content/up-loads/2015/03/Hoppenstedt-DuPage-10122017.pdf.

1. Water Commissions

The establishment of a water commission is enabled by and addressed in the Illinois Municipal Code's Joint Acquisition and Operation of Water Supply and Waterworks (65 ILCS 5/11 135) and, for Special Districts, the Illinois Water Commission Act of 1985 (70 ILCS 3720). These State Acts place decision-making authority for water commissions in the hands of municipal leaders and county boards, and establish the legal boundaries and governance frameworks within which water commissions can develop and adopt policies regarding management and oversight of local municipal water systems. A municipality can join a water commission regardless if they are a home rule community or not.

The following stipulation outlines which State Act (between the two listed above) a group of municipalities forming a water commission is governed by:

- A water commission formed by municipalities, excluding cities of 500,000 or more inhabitants, must abide by the Joint Acquisition and Operation of Water Supply and Waterworks Act.
- When the municipalities forming a water commission represent, in aggregate, more than 50% of the population of a county (hereinafter referred to as the "home county"), and that county is contiguous to a county which has a population in excess of 1,000,000 inhabitants, the provisions of the Commissions Act of 1985, for Special Districts, apply.

The governing body for water commissions formed under either State Act is a Board of Commissioners. The process of selecting a Board of Commissioners, as well as some of the operational requirements, depends on which State Act governs the water commission. The following outlines those respective processes.

Commissions founded under Joint Acquisition and Operation of Water Supply and Waterworks

Governing Authority

The Joint Acquisition and Operation of Water Supply and Waterworks Act enables the county board and mayors (or presidents) of represented municipalities to appoint commissioners. Each commissioner appointed to represent a member municipality under the Joint Acquisition and Operation of Water Supply and Waterworks Act must be an elector or the chief administrator of the municipality they represent, and is appointed by the mayor or president of that municipality. Likewise, the commissioner representing the county (see Highlights) has to be an elector of the county and is appointed by the presiding officer of the county board. The appointed commissioners then elect one member to serve as chairperson. This Act also stipulates that commissioners serve six-year terms, which are eligible for reappointment upon expiration.

Highlights:

- The Board of Commissioners is composed of:
 - o One commissioner representing the county- appointed by the county board of the county in which the major part of the works of the water commission are, or will be, located
 - o One appointed commissioner representing each member municipality
- Commissioners may or may not be elected officials
- Commissioners serve six-year terms

Fiscal Powers

In terms of the financial aspects of water utility services provision, the Joint Acquisition and Operation of Water Supply and Waterworks Act stipulates that a water commission may borrow funds for payment of development costs in advance of permanent financing. The water commission may also issue interim notes for these costs, which must mature within five years from the issue date.

Commissions founded under the Illinois Statutes for Special Districts, Water Commission Act of 1985

Governing Authority

Similar to the Joint Acquisition and Operation of Water Supply and Waterworks Act, the home county board and mayors (or presidents) of represented municipalities are responsible for appointing commissioners. Each county board district and represented municipalities with a majority of residents residing in the home county are each represented by one appointed commissioner (see Highlights). A chairperson (who also serves as a commissioner) is appointed by the county board. Commissioners may be a member of the governing board or officer or employee of the municipality or county from which the appointment is made. The Act also stipulates that commissioners serve six-year terms, which are eligible for reappointment upon expiration.

Highlights:

- All commissioners must be residents of the home county
- Commissioners are appointed, and may or may not be elected officials
- 'Represented municipalities' (aka 'included units') are municipalities that have the greatest percentage of their populations living within the county board district of the home county. Commissioners for these municipalities are appointed by majority vote of their respective mayors.
- Commissioners serve six-year terms

Fiscal Powers

In terms of the financial aspects of water utility services provision, the Illinois Water Commission Act of 1985 stipulates that a water commission may:

- Borrow funds for corporate purposes up to 5.75% of the aggregate value of the taxable property within its territorial boundaries
- Borrow funds from the home county
- Issue general obligation bonds provided that the proposition is submitted to the voters and approved by a majority, however a vote is not required when bonds are for existing debt

A general obligation bond must:

- Mature within 40 years from the issue date
- Be sold at private or public sale
- Bear interest at a rate such that the net effective interest rate does not exceed the maximum rate determined under Section 2 of the Bond Authorization Act

Stipulations of water commissions under either of the above Acts

Ownership, Operation and Maintenance Responsibilities

These Acts provide water commissions with the appropriate powers and authorities in terms of coordination, finance and taxation that outline the legal boundaries within which to conduct strategic planning and policy making. Decision-making regarding infrastructure ownership and the division of roles and responsibilities resides with the water commission's Board of Commissioners.

Taxation Rights

Either state statute allows a water commission to levy taxes throughout its territory. However, these taxation rights are subject to each municipality's current, local taxing authority rules, ordinances and powers.

Examples of Water Commissions

Brookfield-North Riverside Water Commission (Cook County): Established in 1939

Enabling Act: Water Commissions Act of 1985

This water commission originally served Brookfield and North Riverside. LaGrange Park and Lyons subsequently joined in 1999. The commission purchases its water from both Chicago and Forest Park.

Board of Commissioners composition and requirements:

- One commissioner from each represented municipality
- One commissioner/chairperson from Cook County
- Six year terms (staggered)

Northwest Water Commission (Cook County): Established in 1957, distribution started in 1984 Enabling Act: Joint Acquisition and Operation of Water Supply and Waterworks This water commission purchases its water from Evanston before distributing it to Arlington Heights, Buffalo Grove, Palatine, Des Plaines and Wheeling. Des Plaines is a customer of the commission, but is not a voting member.

Board of Commissioners composition and requirements:

- One commissioner from each represented municipality
- One commissioner appointed by Cook County
- Six year terms

Hillside Berkley Water Commission (Cook County): Established in 1948

Enabling Act: Joint Acquisition and Operation of Water Supply and Waterworks This water commission purchases its water from Chicago through a pipe system maintained by Melrose Park. The water is then sold to Hillside and Berkeley.

Board of Commissioners composition and requirements:

- One commissioner from each represented municipality
- One commissioner appointed by Cook County
- Six year terms

Water Commission Considerations

- Consideration should be given to the distribution and balance of power, including the home county, related to representation, authority and voting rights across political and regional boundaries of the water commission.
- Since appointed commissioners may or may not be elected officials, communities should consider whether or not commissioners should have expertise in water management, utility operations, strategic planning and/or risk management.
- Communities that receive all or a portion of their drinking water from the commission, but are not a commission member, will be automatically made a commission member if they meet all of the following requirements:
 - The community has been a continuous customer for 20 years or more
 - The community receives at least 90% of its drinking water from the commission, and
 - The population of the community exceeds 20% of the population of the current member municipalities in the water commission

2. Municipal Joint Action Water Agency

The establishment of a municipal joint action water agency (JAWA) is enabled by and addressed in the Illinois Municipal Joint Action Water Agency Act (5 ILCS 220/3.1). In a JAWA, decision-making authority is placed in the hands of elected or appointed representatives within the JAWA service area. The Act establishes the legal boundaries and framework within which communities develop and adopt specific policies and strategies regarding management and oversight of local municipal water systems, and stipulates a number of conditions regarding governance. A municipality can join a JAWA regardless if they are a home rule community or not.

Governing Authority

Governing body: Board of Directors

The State of Illinois requires inclusive representation across the JAWA territory. This means one representative from each member municipality, public water district, Township, state university and County within the jurisdiction of the JAWA is appointed by ordinance of the corporate authorities of the respective municipality, public water district, Township or County. This appointed Board of Directors then elects one Director to serve as Chairperson. Directors' terms of office are defined in the initial agreement establishing the JAWA, and may include provisions for appointing alternates.

Highlights

- Each Director has one vote
- Each municipality, public water district, township, state university and county has a representing Director who shall be either:
 - o mayor or president of a JAWA member municipality
 - o chairperson of the board of trustees of a JAWA member public water district
 - o supervisor of a JAWA member Township
 - o the appointee of the state university
 - chairperson of the county board or chief executive officer of the JAWA member county, or a county board member appointed by the chairperson of the respective county board
 - an elected member of the corporate authorities for a municipality, public water district, Township, or County that is a JAWA member; or
 - o an elected official of a municipality, public water district, Township, or County that is a JAWA member.

Fiscal Powers

In terms of the financial aspects, the State Act allows a JAWA to borrow funds and issue negotiable water revenue bonds or notes, provided the proposition is submitted to the voters and approved by a majority. It is further stipulated that the bonds or notes may bear interest at a rate or rates not to exceed the maximum rate established in the Bond Authorization Act. It also stipulates that the JAWA cannot terminate and no member may withdraw from the agency when any bonds or notes are outstanding and unpaid.

Taxation Rights

A JAWA may levy taxes throughout its territory. However, these taxation rights are subject to each municipality's current, local taxing authority rules, ordinances and powers.

Examples of Municipal Joint Action Water Agencies

Central Lake County JAWA: Established in 1986

Formation of the agency was driven primarily by decreasing groundwater supplies coupled with the rising costs of purchasing treated Lake Michigan water. The JAWA maintains full ownership of a treatment plant and supply system that uses Lake Michigan water, and provides water to Grayslake, Gurnee, Lake Bluff, Lake Villa, Libertyville, Lindenhurst, Mundelein, Round Lake, Round Lake Beach, Round Lake Consortium, Volo and Wauconda. The JAWA's water supply system became operational in March of 1992.

Board composition and requirements:

- One Director from each municipality
- Two year terms

Northwest Suburban Municipal Joint Action Water Agency: Established in 1981

The JAWA owns a pumping station it uses to distribute Lake Michigan water it purchases from the City of Chicago. It provides water for Hoffman Estates, Streamwood, Hanover Park, Schaumburg, Rolling Meadows, Mount Prospect and Elk Grove Village.

Board composition and requirements:

- One Director from each village (mayor/president)
- Two appointed non-voting members (secretary and treasurer)

JAWA Considerations

- All Directors must be an elected official of their member municipality, public water district, township, state university or county.
- Examine water governance structure options in the context of representation as well as voting power. Municipalities may opt to further shape and adapt the partnership using ordinances and/or resolutions to meet their needs.
- According to the State Act, member communities are not able to terminate or leave the JAWA when an outstanding debt (bond or note) exists.

3. Wholesale Water Service

A wholesale water service is when a single municipality owns and operates a water utility that also serves other municipalities or communities outside of its municipal boundaries. While each municipality that purchases from the wholesale provider is required to maintain their respective infrastructure e.g., distribution system, the municipal government providing drinking water service is responsible for and has full authority over the operations and maintenance of the system by which it supplies drinking water to the other communities.

Governing Authority

The Illinois Intergovernmental Cooperation Act (5 ILCS 220/) as well as the 1970 Constitution of the State of Illinois, Article VII Section 10 provide the authority for units of local government to contract among themselves, with other units of local government, and with other states and their units of local government to share services and to exercise, combine, or transfer any power or function, in any manner not prohibited by law or ordinance. As such, these legislative instruments provide the legal authority to enter into wholesale water supply service agreements.

Example of a Wholesale Water Service

The following example illustrates how wholesale water service can be established between municipalities.⁴

The <u>Oak Lawn Regional Water System</u> stores and delivers Lake Michigan water, purchased from Chicago, to the following municipal customers: Oak Lawn, Chicago Ridge, Country Club Hills, Matteson, Mokena, New Lenox, Oak Forest, Olympia Fields, Orland Hills, Orland Park, Palos Hills, Palos Park and Tinley Park. The initial and primary water contract, enabled by the Illinois Intergovernmental Cooperation Act, was signed in 1973 between the Villages of Oak Lawn and Tinley Park. Since that time, municipalities have been added and agreements amended, with the most recent version having been amended in 2014.⁵

Ownership and Operations

Each respective municipality owns and operates its own system. Member municipalities are required to maintain a certain standard of infrastructure performance through the development and adoption of an asset management program. These programs focus on identifying and incorporating best management practices to ensure the member system is operating effectively and efficiently, as well as in compliance with all applicable federal, state and local laws, codes, ordinances, rules and regulations.

The Oak Lawn Regional Water System delivers water to municipalities via systems that Oak Lawn owns and operates as well as those it does not. Specifically, Oak Lawn owns and operates the system that delivers water to the Villages of Country Club Hills, Matteson and Olympia Fields. The Tinley Park Branch System, not owned and operated by Oak Lawn, delivers water to the Villages of Tinley Park, Mokena and New Lenox.

Representation

The water contract stipulates having a framework for a cooperative relationship between members. Working groups were established to promote transparency and provide a mechanism for members to review and provide input to Oak Lawn. There are currently three working groups comprised of municipal members and representatives: Management, Operations, and Finance/Administration.

Service Costs

Costs for each municipal member are allocated based on their "Proportionate Share" which is for the life of the Agreement. This share of the capital costs and charges is determined using a formula based on each municipality's proportionate water supply demand, how much of the System it used (energy, pump, pipe maintenance), and its distance from the water source.

Financing System Improvements

The Oak Lawn Regional Water System has the authority to finance system improvements. Over the years, some of these improvements include a new water transmission main, piping improvements, a new pumping station as well as improvements to two booster stations. In order to fund these system improvements it has issued General Obligation Corporate Purpose Bonds as well as received loans from the State Revolving Fund. Proportional payments for system improvements are based on each community member's proportionate share of aggregate costs, as outlined above.

⁴ Village of Orland Park. (2013). Village of Orland Park, Illinois. Document Center. Retrieved from Orland Park, Tinley Park, New Lenox, Mokena, Oak Forest: http://il-orlandpark.civicplus.com/DocumentCenter/View/23069.

⁵ Village of Orland Park. (n.d.). Village of Orland Park. Retrieved from https://www.orland-park.il.us/DocumentCenter/View/25624.

Wholesale Water Service Considerations

- The municipality that provides wholesale water service to other municipalities is accountable to regulatory standards, and is financially responsible for maintaining the system it operates. Because of this, it is important to set appropriate water rates with its municipal customers to ensure the utility operates efficiently and is self-supporting.
- Municipalities thinking about proportional-share rate structures should consider what factors to include as inputs to the formula. For example, present population, future population, demand forecasts, miles of pipe, pipe size, etc., as well as the frequency in which reevaluations are conducted to ensure consistent alignment between costs and rates.

4. Public-Private Partnerships

A public-private partnership is a cooperative arrangement between two or more public and private sector actors to provide a service. There are numerous configurations of public-private partnerships, however, they all involve a distribution of functions and responsibilities across these two sectors. For the purposes of this report, the overarching concept is that government and private companies establish a service contract together to provide drinking water service for a common service area and population.

There are more than 2,000 community water or wastewater facilities across the United States that are designed as public-private partnerships, ranging from large design-build-operate projects to small facility operations or shared functions in administration and billing.⁶ Many public agencies, in an effort to reduce costs, outsource or contract out operational functions to private or corporate firms as these organizations tend to benefit from greater economies of scale. The Environmental Protection Agency has long advocated the use of public-private contracts in drinking water service as it is believed these types of partnerships can help reduce costs, speed project completion, guarantee performance and preserve jobs.⁷ Some common types of public-private partnerships are summarized in the Table on page 11.

Public-Private Partnership Considerations

- Ensure the contract clearly states the division of responsibilities between the public and private actors.
- Consider executing performance-based contracts to ensure the private sector is incentivized to improve operations and management. Or a public-private contract could include a performance management plan in order to measure a utility operator's performance and establish accountability.
- Make sure to clearly define the following within the service contract:
 - How water rates can/should be calculated and modified over time.
 - Protocols for future system improvement needs such as non-revenue water, meter maintenance, pumping station improvements, etc.

⁶ Cleantech. (n.d.). The US Water Sector on the Verge of Transformation. Retrieved from http://www.ey.com/Publication/vwLUAssets/Cleantech_Water_Whitepaper.pdf.

⁷ USEPA. (1989, September). Public-Private Partnerships for Environmental Services, Region 3 Conference Proceedings. Retrieved from https://nepis.epa.gov.

| Types of Public-Private Partnerships ⁸ | | | |
|---|--|--|--|
| Partnership Option | Description | | |
| Joint Venture | A private contractor owns a water system in conjunction with a public utility. | | |
| Build, Operate, and Transfer (BOT) | A private contractor builds, owns and operates the water system. At the end of a specified period of time, such as 30 years, the system may be transferred to the public utility for a nominal fee. | | |
| Design-Build-Operate | These partnerships grant a single contract agreement to a single private entity to design, build and operate a new water utility while the municipality retains ownership. | | |
| Turnkey Facility | A private contractor designs, builds and operates the water system. The public utility retains ownership and generally assumes the financing risk, while the private contractor assumes the performance risk for minimum levels of service and/or compliance. | | |
| Full-Service Contract | A public utility contracts with private contractor, for a fee, to operate and maintain the water system. The public utility owns the system (although it may have been built by the private contractor). | | |
| Single Municipality– Contract or Delegated Man- agement: | In this arrangement, the municipality owns the water system and contracts with a private firm to perform any/all of the following services: Operation and maintenance of the public utility's system over a long or short term. Management oversight and supervision of the public utility's personnel. Provides transition management or program management to improve effectiveness of the public utility's operations. | | |
| Multiple Municipalities– Contract or Delegated Man- agement | Multiple municipalities work with a private sector contractor to cooperatively provide drinking water service to the municipalities. Under a delegated management arrangement, the owner(s) of the water system contracts out various aspects of water utility management to a private entity. In this scenario, the municipality(s) retains ownership of the water systems assets. A legally binding, time-bound contract dictates the rights and duties of each party. | | |

As the above table demonstrates, there is flexibility in how the public and private sector can come together to provide drinking water service to communities. The responsibilities and duties the public or private sector take on vary depending on the purpose of the partnership.

⁸ NRC. (2002). Models of Water Service Provision. In N. R. Council, Privatization of Water Services in the United States: An Assessment of Issues and Experience (2002) (pp. 56-80). The National Academies Press. Retrieved from The National Academies Press: https://doi.org/10.17226/10135.

5. Privatization

While not a traditional shared service model for drinking water, there is the option for municipalities, individually or jointly, to privatize water service. In a completely privatized model, a corporation owns and operates the water supply system, and becomes the water service provider for a municipality or group of municipalities. Privatization of drinking water service transfers all ownership, operations and management responsibilities to the private sector.

In the State of Illinois, all privately-owned water utilities are governed by the <u>Illinois Commerce Commission</u> (ICC). These utilities have an additional layer of regulatory oversight, administered by the ICC, which oversees water rate setting and utility organization (such as a merger of two or more utilities) both of which must go through due process and be approved by the ICC.

Municipalities may sell their existing water utility(s) to a private entity, or elect to fund through various financial mechanisms, the construction of a new utility for this purpose. In this model, the role of the municipal government(s) is to establish policies and provide oversight in addition to the oversight and regulation the ICC already has.

Privatization Considerations

- Clear and measurable performance indicators are essential to ensure the private sector is meeting the terms of the contract.
- In Illinois, the utility will now be under the purview of the Illinois Commerce Commission (ICC) who can often have a greater capacity for oversight than local governments for compliance with regulations and best management practices.⁹
- The financing and tax advantages of public ownership are lost, and rates may have to be increased to pay for the costs associated with private financing, particularly if water had been underpriced relative to actual costs previously.9 However, the region could stand to gain from the corporate taxes the private utility now contributes to the tax base.

⁹ NRC. (2002). Models of Water Service Provision. In N. R. Council, Privatization of Water Services in the United States: An Assessment of Issues and Experience (2002) (pp. 56-80). The National Academies Press. Retrieved from The National Academies Press: https://doi.org/10.17226/10135.

General Considerations

There are many questions municipalities need to explore before deciding 1) to enter into a shared service model, and 2) what model best supports the needs of the communities being served. The following list highlights some particular considerations that should be examined.

- Engage stakeholders early in the process. Work collaboratively to identify the issues motivating action and gain buy-in regarding potential approaches. This will improve the likelihood that the option selected is best suited to the challenge at hand.
- In all resource sharing efforts, relationships are very important. Having an established, good working relationship across municipalities is key. Although it can be difficult, it is best to be open and upfront about any potential concerns and address these issues early on.
- Examine water governance structure options in the context of representation as well as
 voting power. The Illinois statutes for Water Commissions and Municipal Joint Action Water
 Agencies dictate certain elements of governance structures, however, municipalities may opt
 to further shape and adapt the partnership using ordinances and/or resolutions to meet the
 needs of individual municipalities.
- Ensure that the system elements work as one unit rather than compete with each other.
 Municipalities need to consider a range of options when evaluating potential rate structures,
 particularly with respect to equity. Consider the location of the water supply source (or water utility), and how this will impact distribution costs for each community. Determining an equitable rate structure across the service area is important.
- Review and determine the membership process—how members join at formation of a shared service arrangement as well as after it has been in operation. For example, Water Commission and Municipal Joint Action Water Agency statutes provide for the addition of members after initial foundation and include provisions for passive membership that should be understood.
- Understand the current and potential future service area region and the implications of neighboring municipalities joining the partnership. Communities need to consider how population growth within their service area, as well as possible expansion of the service area, will impact demands on the utility. These changes can also impact the overall balance of power among members over time.
- When considering regionalizing drinking water service, it is important to have a full understanding of the internal operations and business processes across communities. Members should exercise due diligence. Bringing in a third-party as a mediator can be helpful, and these parties can also perform a financial analysis of all members and any contract agreements as well. This also allows for identification of where efficiencies in service could be implemented in order to improve system operation and performance.
- Utility staffing should be considered carefully when exploring shared service models. How
 costs will be distributed across municipalities with regards to personnel and pension considerations, etc. are important to understand and delineate up-front.
- Stewardship of water resources is key to sustainable communities. Understanding current and future conditions and risks is an important part of ensuring a shared service model is protecting its water source appropriately.

| Comparing Water Commissions and Joint Action Water Agencies | | | | | |
|---|-----------------|------------------------------|------------------|---|--|
| Governance Type | County Involved | Borrow money and issue bonds | Taxing authority | Governing members must be elected officials | |
| Municipal Joint Action Water Agency | × | | | | |
| Water Commission | / | / | / | X | |

Additionally, before exploring what legal governance structure might be most appropriate for the communities involved, being clear about motivations, circumstances and existing relations between communities is essential. Following are important considerations communities, independently and jointly, should be clear about in order to better understand what governance structure might be appropriate for shared drinking water service.

- Clear goals should be established between the partner communities. Are the communities trying to save money, protect a shared resource, attract business? What are the motivations and clearly stated goals for why a shared service model would be beneficial?
- Fairness is important for building trust when entering into a long-term partnership. Ensure equitable representation of communities involved.
- Have clear legal understanding of how a shared service will operate including voting rights and representation, taxation and financing abilities, legal rights for entering or leaving a service contract, and transparent cost delineation and responsibilities.
- Safe and reliable drinking water is a foundation of community livability. Any decisions made about drinking water service should be transparent to your community members as well as safe and sustainable over the long-term.
- Finally, the following facts need to be understood for each community involved before moving forward with exploring governance structure options:
 - What county(s) each community is located in
 - Current and projected population of each community
 - Current and projected water use within each community

Conclusion

This summary report provides a high-level overview of water governance structures and considerations in order to assist municipalities, particularly in Illinois, in understanding the various options for regionalized drinking water service in their communities.

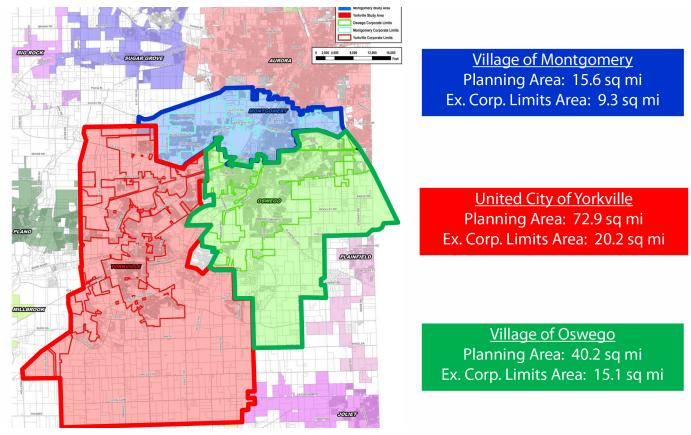

The five categories of water governance structures highlighted provide a broad ranging view of how shared water supply service in Illinois can operate. As the costs to provide safe and sustainable drinking water services continue to increase, the need to explore cost sharing opportunities will be even more important. Communities working together enables municipalities to reduce these costs by sharing resources, leveraging shared infrastructure, accessing financing options together, improving their collective purchasing power and ultimately ensuring their communities have safe and sustainable drinking water now and into the future.

Acknowledgements

This report was funded by the Illinois Department of Natural Resources (IDNR) via the Chicago Metropolitan Agency for Planning's (CMAP) Local Technical Assistance (LTA) Program. The Metropolitan Planning Council is grateful to both IDNR and CMAP for their support of this work.

Appendix A: Community Profiles—Oswego, Montgomery and Yorkville

The following provides some additional context about the three communities who originally requested this governance structure report. The following type of information is important for any community to assess before considering a shared service model.

Map Source: http://www.eeiweb.com/resources/presentations/watercon2017/Sub-Regional%20 Water%20Supply%20&%20Treatment%20Analysis%20(Freeman)%20-%20HANDOUTS.pdf.

The Village of Oswego and United City of Yorkville, Illinois are wholly located in Kendall County, while the Village of Montgomery, Illinois crosses Kane and Kendall Counties. Yorkville is the county seat of Kendall County and follows a mayor-council government structure, whereas Montgomery and Oswego use a Village Board model.

The following table provides current and projected population for all three communities. As the table indicates, Oswego currently has the largest population among the three communities and, if the current trend continues, will grow further to make up 47% of the total population by 2050. Oswego is also the largest community located entirely within Kendall County. Yorkville, currently the least populated of the three communities, is expected to grow in population and bypass Montgomery's population by nearly 10%.¹⁰

| Population Trends for Oswego, Montgomery and Yorkville | | | | | | |
|--|--------------|-----------------------|-----------------|--------------------------|-----------------|----------------------------------|
| County | Municipality | Current Population | % of Population | Annual Growth Rate | % of Population | 2050 Population Projection |
| Kendall | Oswego | 34,820 | 42% | 2.8% | 47% | 90,996 |
| Kane and Kendall | Montgomery | 28,346 | 34% | 2.0% | 22% | 42,000 |
| Kendall | Yorkville | 19,804 | 24% | 3.2% | 31% | 59,565 |
| | Total: | 82,970 | | | | 192,561 |

Data compiled from Illinois State Water Survey: https://www.isws.illinois.edu/pubdoc/CR/ISWSCR2013-05hi-res.pdf and Engineering Enterprises, Inc.: https://www.isws.illinois.edu/pubdoc/CR/ISWSCR2013-05hi-res.pdf and Engineering Enterprises, Inc.: https://www.eeiweb.com/resources/presentations/watercon2017/Sub-Regional%20Water%20Sup-ply%20&%20Treatment%20Analysis%20(Freeman)%20-%20HANDOUTS.pdf

The following table outlines past and projected water demand for the three communities. As the table indicates, these communities are projected to significantly increase water demand, and sustainable sources, along with best practices in water demand management, will be necessary.

| | Historical and Projected Water Demand | | | | |
|------|---------------------------------------|--------------------|---------------------|--|--|
| Year | Oswego | Montgomery | Yorkville | | |
| 2000 | 1.25 Mgd reported ¹ | 2.2 Mgd reported | 0.6 Mgd reported | | |
| 2010 | 2.6 Mgd reported ¹ | 1.9 Mgd reported | 0.95 Mgd reported | | |
| 2020 | 3.1 Mgd to 3.8 Mgd ^{2,3} | 1.9 Mgd to 2.6 Mgd | 1.3 Mgd to 2.0 Mgd | | |
| 2050 | 8.2 Mgd to 15.6 Mgd ^{2,3} | 3.8 Mgd to 6.6 Mgd | 5.4 Mgd to 10.7 Mgd | | |

¹ ISWS data as of 2013

Data compiled from Illinois State Water Survey: https://www.isws.illinois.edu/pubdoc/CR/ISWSCR2013-05hi-res.pdf and Engineering Enterprises, Inc.: https://www.isws.illinois.edu/pubdoc/CR/ISWSCR2013-05hi-res.pdf

Given the varied population distribution across the communities, and projections for future water demand, careful consideration of what new water source(s) would be sustainable for these communities is important. Additionally, the distribution of equitable costs for each community will need to be addressed when considering a shared service model.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Erin Willrett, Assistant City, Administrate

Erin Willrett, Assistant City Administrator Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: August 14, 2018

Subject: ADA Transition Plan Status Update

Public comment was sought on the draft plan. No comments were received during the comment period. As outlined in our May2, 2018 memo the next steps are:

- Adoption of technical guidelines to comply with ADA Standards. Local Public Agencies are allowed to adopt Section 41-6 of the Illinois Bureau of Local Roads and Streets Manual as their technical guidelines. Those guidelines are current in the report as Exhibit F.
- Formal adoption of the final version of the plan.

Let me know if you have any questions or need additional information.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Erin Willrett, Assistant City Administrator Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: May 2, 2018

Subject: ADA Transition Plan Status Update

The purpose of this memo is to provide a status update on the ADA Transition Plan. A draft of the plan has been completed and is attached for your review.

The next steps in the process of formally adopting the plan include:

- Posting the draft plan and seeking public comment over a minimum of a 30-day period. Any appropriate comments will then be incorporated into the plan.
- Adoption of technical guidelines to comply with ADA Standards. Local Public Agencies are allowed to adopt Section 41-6 of the Illinois Bureau of Local Roads and Streets Manual as their technical guidelines. Those guidelines are current in the report as Exhibit F.
- Formal adoption of the final version of the plan.

A potential timeline for the process is outlined below:

- May 15th Public Works Committee review of draft plan
- May 22nd City Council review of Public Works Committee recommendation
- May 23rd Posting of draft plan for public comment
- June 26th Consideration by City Council of formally adopting the plan and technical guidelines

It should be noted that the plan addresses curb ramps within public rights of ways only and does not address public facilities. It should also be noted that the plan will need to be periodically updated as non-compliant ramps are replaced and/or that new ramps are added.

Draft Transition Plan for Public Right of Ways

Introduction

The United City of Yorkville has an expansive pedestrian system that links neighborhoods, recreational resources, government facilities, retail centers and business establishments. Pedestrian accessibility provides benefits not only for people with disabilities, but for the community at large. In an effort to continuously improve the pedestrian system, this document was prepared in accordance with the Americans with Disabilities Act to serve as the Public Right-of-Way Accessibility Transition Plan for the United City of Yorkville. Included in this document are the results of a self-evaluation that addresses accessibility barriers to City programs, activities and services.

Federal Requirements

The federal legislation known as the American with Disabilities Act (ADA), enacted on July 26, 1990 and later amended effective January 1, 2009, provides comprehensive civil rights protections to qualified persons with disabilities from discrimination on the basis of disability. Title II of the ADA prohibits discrimination in all services, programs, and activities provided to persons with disabilities by State and local governments, including transportation. Local public agencies (LPA) with more than 50 full or part-time employees are required to perform self-evaluations of their current facilities relative to the accessibility requirements of the ADA and then establish a plan to correct any deficiencies. A self-evaluation is also required by Section 504 of the Rehabilitation Act for all entities receiving federal financial assistance, including federal highway aid for transportation projects. The process of self-evaluation for accessibility provides a framework for communities to develop a Transition Plan that identifies barriers, prioritizes actions to address barriers and then sets forth a schedule to implement those actions.

Under Title II of the ADA the City is required to:

Designate officials responsible for implementation;

Provide public notice and opportunity for public participation;

Develop a grievance procedure;

Adopt design standards and guidelines;

Prepare a self-evaluation;

Schedule and budget for improvements to achieve compliance; and

Monitor progress

This Transition Plan incorporates these elements and provides a method for the United City of Yorkville to schedule and implement required improvements as it pertains to pedestrian sidewalks ramps within the public right-of-way.

Self-Evaluation

Under Title II of the Americans with Disabilities Act, the United City of Yorkville is required to conduct a self-evaluation. To date the United City of Yorkville has conducted a self-evaluation of sidewalk curb ramps within the public right-of-way. The inventory has been developed using studies of existing aerial photography and through field survey. Some barriers to the pedestrian access route created by non-compliant curb ramps are narrow sidewalks; excessive slope of landings, cross slope, or running slope; damaged, missing, misaligned, improperly sized detectable warning tiles; and not fully depressed or excessively sloped curb & gutter.

Inventory Methodology of Assets in Public Right-of-Way

A methodology was developed to field inspect existing sidewalk curb ramps which are non-complaint with the requirements of the Americans with Disabilities Act. To begin, all curb ramp locations within the United City of Yorkville right-of-way were identified and labeled with point and given an identification number using available aerial photography. From the aerial photographs the curb ramps the presence or lack of a detectable warning tile was determined. The curb ramps were identified as "non-compliant" if the detectable warning tile was not visible in the aerial and "potentially compliant" if the detectable warning tile was visible in the aerial. Those curb ramps labeled as "potentially complaint" were selected to be field measured to record the dimensions and slopes of the curb ramps.

The field evaluation was performed by engineering staff using a calibrated smart level to record the critical dimensions and slopes of the curb ramps. The identification number generated from the aerial evaluation, maximum cross slope of landings, maximum cross slope of ramps, maximum cross slope of depressed curb and gutter, maximum running slope of ramps, condition and location of detectable warning tiles, width of the ramp, length of the ramp and presence of a corresponding ramp were all recorded on field inspection sheets.

The collected data was input to a spreadsheet to evaluate the curb ramp elements for compliance with ADA requirements. An aerial map overlaid with current curb ramp compliance status is included as Exhibit A. An atlas of with additional detail is included as Exhibit B. A spreadsheet of data collected in the field is included as Exhibit C.

Identification of Barriers

Curb ramps were evaluated according the maximum allowable slopes as shown in the IDOT Standard Details which are included as Exhibit C. One exception to the IDOT detail is that the United City of Yorkville has developed an individual Standard Detail which supplements the IDOT Standard Detail and is used to eliminate the optional side curb or sidewalk flares and to identify the length of the curb and gutter transition. This detail is included as Exhibit E. These Standard Details and/or the IDOT Standard Specifications for Road and Bridge Construction specify the minimum dimensions, maximum slopes, materials to be used in the construction of compliant curb ramps. Any curb ramp which is constructed below these requirements may create a barrier to pedestrian access.

Detectable warnings must come with a Manufacturer certification stating that the product is fully compliant with accessibility standards, Manufacturer 5 year warranty and Manufacturer specifications

stating the required materials equipment and installation procedures. The product shall be colored throughout the entire thickness and the alignment of the truncated domes is must match the alignment shown in the IDOT Standard Details.

Additionally, the cross slope of curb ramps cannot exceed 2.0%, and the longitudinal slope of curb ramps cannot exceed 8.3%. The slope of curb ramp landings cannot exceed 2.0% in any direction.

At locations where sidewalk curb ramps meet curb and gutter the curb and gutter must be depressed according the IDOT Standard Detail 606001-07. The cross slope of the curb and gutter cannot exceed 2.0%.

The collected data was entered into a spreadsheet which was used to further determine if the ramps were "Compliant," "Near Compliant," "Non-Compliant" or "Require Future Inspection." Based on the evaluation of the data, the color of the points developed from the aerial was changed to different colors so that they can be easily identified in the aerial exhibit. Curb ramps that are compliant appear in the exhibit as green; ramps that have two or fewer non-compliant elements appear as yellow, ramps that lack a detectable warning tile or have three or more non-compliant elements appear as red and ramps that have a detectable warning tile visible in the aerial but need further field evaluation are grey. Some ramps that are under jurisdiction of other agencies, such as the sidewalk curb ramps along Illinois Route 47 which are owned by IDOT are shown as grey.

Transition Plan

The United City of Yorkville has more than 50 employees (full-time and part-time) and is therefore required to develop a public right-of-way accessibility transition plan. This plan will serve as a guide for the City to detail the processes by which accessibility deficiencies will be addressed.

ADA Coordinator

The name and contact information for the ADA Coordinator for the United City of Yorkville is:

Pete Ratos 800 Game Farm Road Yorkville, IL 60560 630-553-8549 pratos@yorkville.il.us

Public Involvement Opportunities

A copy of the Self-Evaluation and Transition Plan will be made available on the City website and will be available by request to the ADA Coordinator listed above. Any resident may address their concerns or comments to the ADA Coordinator.

Grievance Procedure

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the United City of Yorkville. The City's Personnel Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or his/her designee as soon as possible but no later than 60 calendar days after the alleged violation to the ADA Coordinator listed above.

Within 15 calendar days after receipt of the complaint, the ADA Coordinator will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the ADA Coordinator will respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of the United City of Yorkville and offer options for substantive resolution of the complaint.

If the response by the ADA Coordinator does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the City Administrator.

Within 15 calendar days after receipt of the appeal, the City Administrator will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after the meeting, the City Administrator or his/her designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the ADA Coordinator, appeals to the City Administrator, and responses from these two offices will be retained by the United City of Yorkville for at least three years.

Design Standards

The United City of Yorkville is required to adopt technical guidelines that comply with ADA Standards. Local Public Agencies may adopt Section 41-6 of the Illinois Department of Transportation Bureau of Local Roads and Streets Manual as a design standard. Section 41-6 is included in this report as Exhibit F. In addition to Section 41-6 of the Bureau of Local Roads and Streets Manual the City may adopt any available Standards available from IDOT. A Local Public Agency may develop their own design standards but care must be taken to ensure that the standards are fully compliant with the Americans with Disabilities Act.

Self-Evaluation

The Self-Evaluation shall be included in the Transition Plan. In the case of the United City of Yorkville, the Self-evaluation is underway and will continue to be updated as more facilities are evaluated for compliance.

Schedule and Budget for Improvements

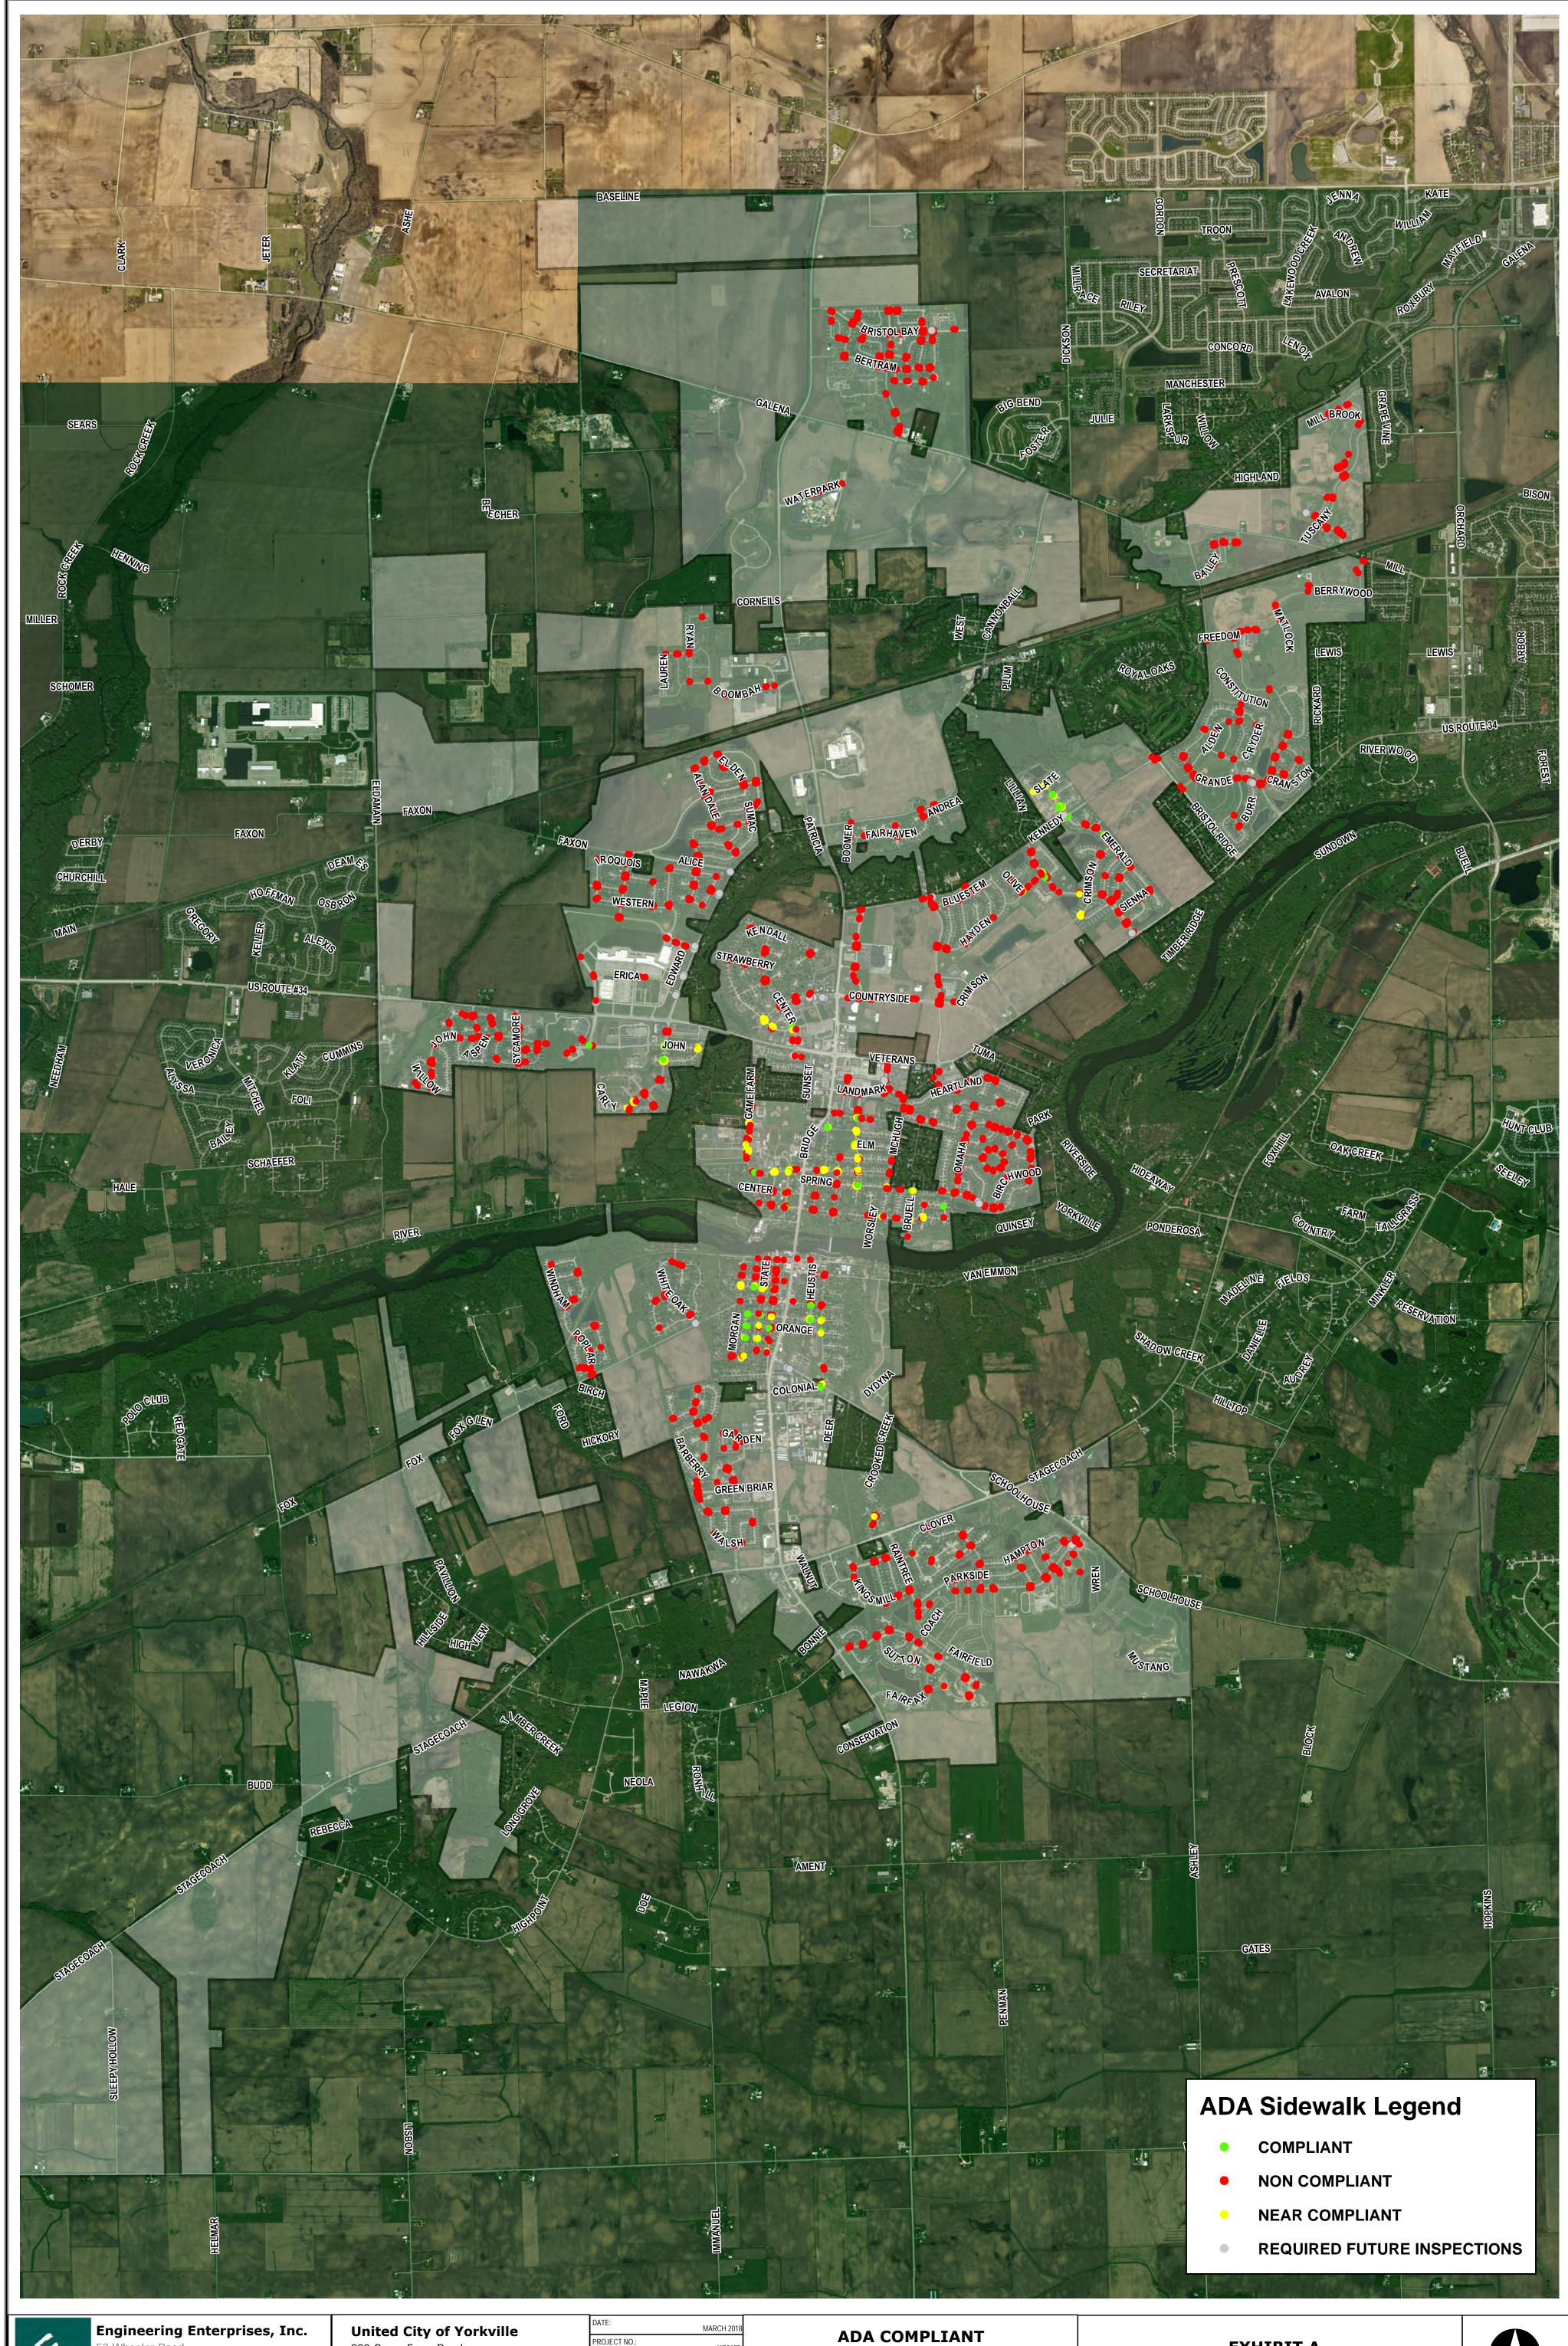

The United City of Yorkville conducts an annual street resurfacing program. Federal law requires Local Public Agencies to update non-compliant curb ramps which are included within the limits of a street resurfacing project. Therefore the City is scheduled to update non-compliant curb ramps as streets within the City are resurfaced. The replacement of a non-compliant ramp in advance of a resurfacing program is possible. The City will consider the severity of non-compliance, citizen complaints regarding inaccessible locations, poor levels of pedestrian service, population density, preserve of a disabled population and the cost when considering an accelerated schedule for replacement. The anticipated replacement costs of non-compliant ramps which have been field inspected to date is included as Exhibit G.

Monitoring Progress

The United City of Yorkville will make updates to this plan as non-compliant ramps are replaced and as additional non-compliant features are evaluated. A list of addenda to this report is included as Exhibit H.

EXHIBIT D

ILLINOIS DEPARTMENT OF TRANSPORTATION CURB RAMP STANDARD DETAILS

SECTION C-C

- ① Turning space not required for ramp slopes flatter than 1:20.
- ② The running slope of the curb ramp shall not require the ramp length to exceed 15' (4.5 m).

GENERAL NOTES

All slope ratios are expressed as units of vertical displacement to units of horizontal displacement (V:H).

Where the turning space is constrained on a side opposite a ramp, the minimum length of the turning space in the direction of the ramp-run shall be 5' (1.52 m).

Where 1:50 maximum slope is shown, 1:64 is preferred.

See Standard 606001 for details of depressed curb adjacent to curb ramp.

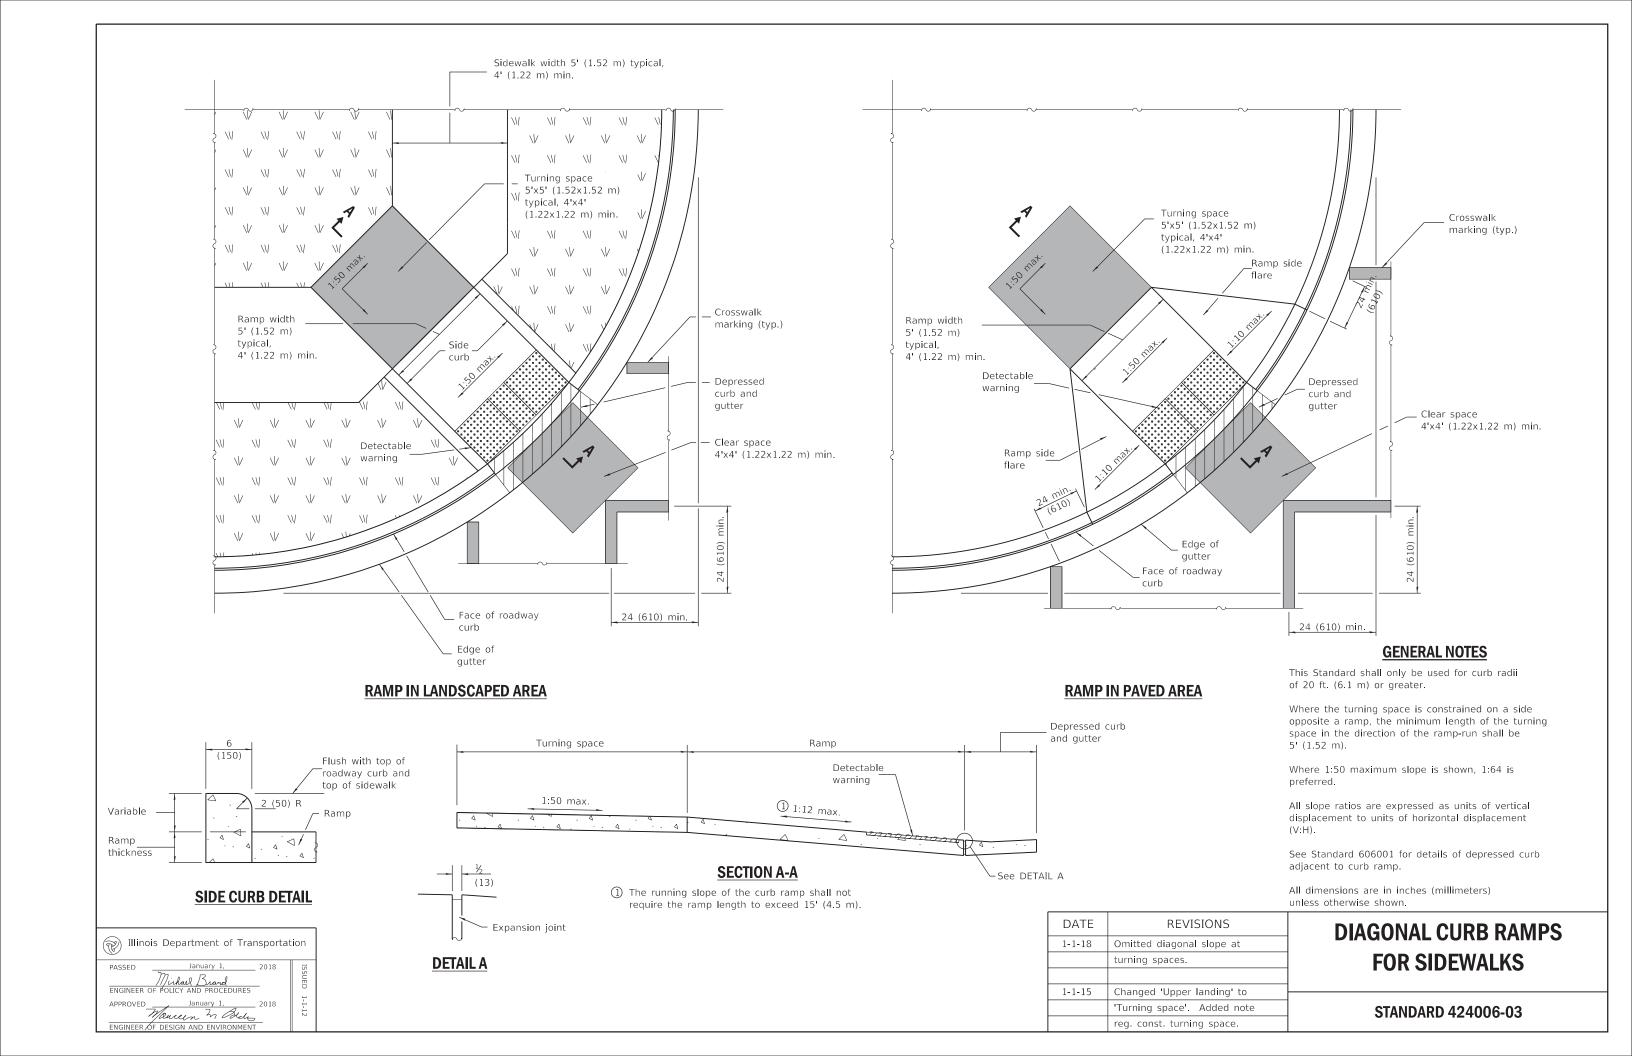

All dimensions are in inches (millimeters) unless otherwise shown.

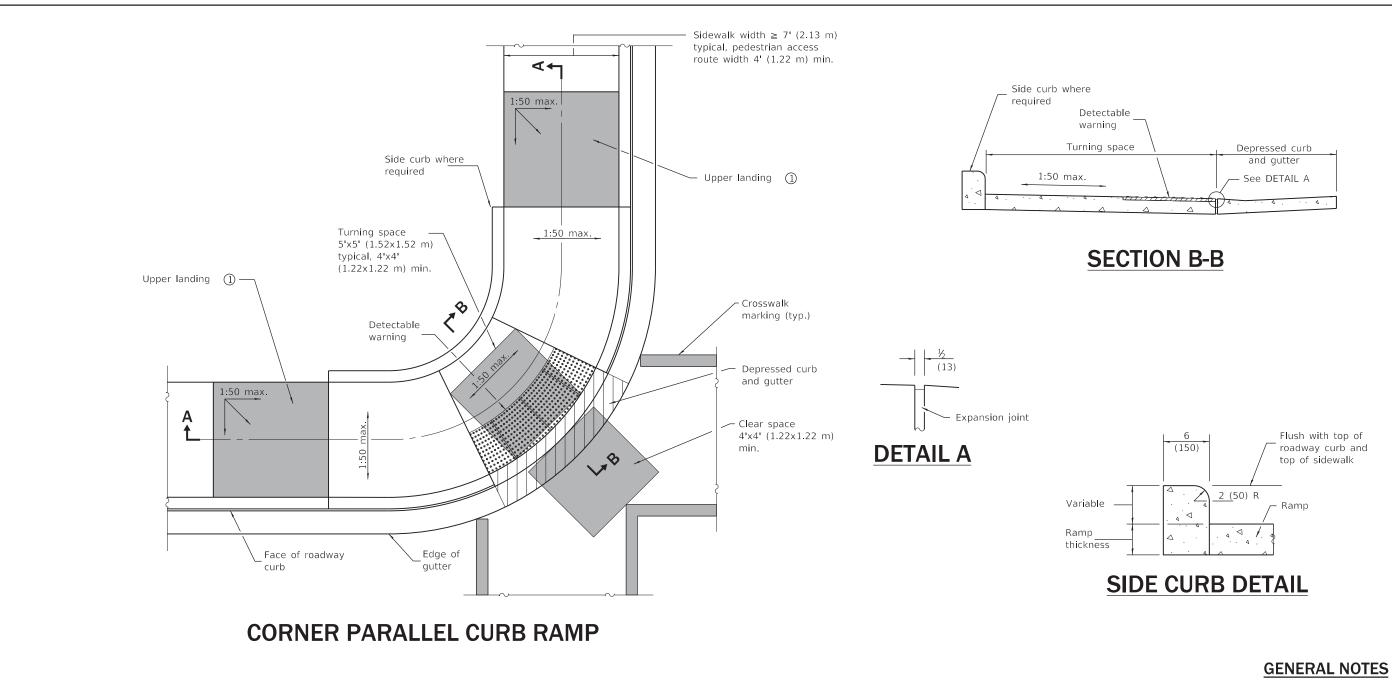

PERPENDICULAR CURB RAMPS FOR SIDEWALKS

BUREAU OF LOCAL ROADS AND STREETS DESIGN STANDARDS

41-6 REQUIREMENTS FOR ACCESSIBLE PUBLIC RIGHTS-OF-WAY

41-6.01 **General**

Many highway elements can affect the accessibility and mobility of individuals with disabilities. These include sidewalks, curb ramps, parking spaces, buildings at transportation facilities, overpasses or underpasses, temporary traffic control, and landscaping or streetscaping. According to the *Americans with Disabilities Act* (ADA), 42 U.S.C. §12181 - 12189 and the *Illinois Environmental Barriers Act*, 410 ILCS 25/1 et seq, public highway right-of-way shall be made accessible to all users. Local Public Agencies (LPAs) are required to perform a self-assessment to determine barriers to accessibility within the public highway right-of-way.

Currently, a national uniform design guideline for public highway right-of-way has not been adopted by the United States Department of Justice and Federal Highway Administration (FHWA). However, the *Proposed Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way (PROWAG)* has been introduced by the United States Access Board through the federal rule-making process. Furthermore, FHWA has issued guidance that PROWAG may be used in order to comply with accessibility requirements. Therefore, the Department recommends that LPAs use the latest revision of PROWAG available at www.access-board.gov, when constructing or altering facilities within the highway public right-of-way.

Figure 41-6A provides a reference to criteria contained in PROWAG unless otherwise noted. The *ADA Standards for Accessible Designs* (ADAAG), the *Illinois Accessibility Code* (IAC), the *Uniform Federal Accessibility Standards* (UFAS), the *ILMUTCD*, and the *American National Standards Institute* (ANSI) should also be consulted as needed. Where LPA policies or local codes require criteria that exceed PROWAG, then the local criteria should be used.

41-6.02 **Equivalent Facilitation**

The use of alternative designs, products, or technologies, that result in substantially equivalent or greater accessibility and usability than the requirements in PROWAG, is permitted. However, the LPA should document how the equivalent facilitation was determined.

41-6.03 Application

All newly constructed facilities, altered portions of existing facilities, and elements added to existing facilities for pedestrian circulation and use located in the public right-of-way shall comply with the requirements in this Section.

| Accessible Component | Scoping Requirements | Technical Requirements |
|--|-------------------------|-------------------------------|
| Pedestrian Access Route (PAR) | R204 | R302 |
| Alternate PAR | R205 | |
| Pedestrian Street Crossing | R206 | R306 |
| Curb Ramps and Blended Transitions | R207 | R304 |
| Detectable Warnings | R208 | R305 |
| Accessible Pedestrian Signals and Pedestrian Pushbuttons | R209 | |
| Protruding Objects | R210 | R402 |
| Signs | R211 | R410 |
| Transit Stops and Transit Shelters | R213 | R308 |
| On-Street Parking | R214 | R309 |
| Off-Street Parking | ADAAG R208 | ADAAG R502; IAC 400.310(c) |
| Passenger Loading Zones | R215 | R310 |
| Stairways and Escalators | R216 | R408 |
| Handrails | R217 | R409 |
| Doors, Doorways, and Gates | R218 | |
| Ramps | | R407 |

SCOPING AND TECHNICAL REQUIREMENTS Figure 41-6A

41-6.04 Alterations

41-6.04(a) General

Where existing elements, spaces, or facilities are altered, each altered element, space, or facility within the scope of the project shall comply with the applicable requirements for new construction unless existing physical constraints exist. The alteration of multiple elements or spaces within a facility may provide a cost-effective opportunity to make the entire facility or a significant portion of the facility accessible.

Figure 41-6B provides a summary of some common alterations.

SPECIAL DESIGN ELEMENTS

| Type of Work | Alteration Required |
|--|---|
| Resurfacing (includes, but not limited to, addition of a new layer of asphalt, reconstruction, concrete pavement rehabilitation and reconstruction, open-graded surface course, microsurfacing and thin lift overlays, cape seals, and in-place asphalt recycling) | Correct non-compliant curb ramps and crosswalks |
| Remove and Replace Sidewalk (sidewalk patch, relocate poles or posts, etc.) | Replace with compliant (includes transition to non-compliant) |
| Curb & Gutter Replacement | Install curb ramps if replaced curb and gutter is at a pedestrian crossing with adjacent sidewalk |
| Pedestrian Signal (signal controller and software altered, or signal head replaced) | Installed Accessible Pedestrian Signals and accessible pushbutton |
| Restriping Parking Markings | Provide accessible spaces |

ALTERATION REQUIRED BY TYPE OF WORK

Figure 41-6B

41-6.04(b) Existing Physical Constraints.

Where existing physical constraints make it impracticable for altered elements, spaces, or facilities to fully comply with the requirements for new construction, compliance is required to the extent practicable within the scope of the project. Existing physical constraints include, but are not limited to, underlying terrain, right-of-way availability, underground structures, adjacent developed facilities, drainage, or the presence of a notable natural or historic feature.

The LPA should document the various options considered, reasons for selecting, and any public comments received concerning an alteration to the extent practicable. Furthermore, the facility shall continue to be listed as a barrier in the LPA's self-evaluation.

41-6.04(c) Transitional Segments.

Transitional segments of an altered PARs shall connect to existing unaltered segments of pedestrian circulation paths. The transitional segment shall be removed when the existing unaltered section is altered in the future.

41-6.04(d) Reduction in Access Prohibited.

An alteration shall not decrease or have the effect of decreasing the accessibility of a facility or an accessible connection to an adjacent building or site below the requirements for new construction in effect at the time of the alteration. Sidewalk improvements that correct existing excessive cross slope should be carefully planned to avoid creating excessive slope in curb ramps or adding a step at existing building entrances. Solutions may include:

1. Split sidewalks that serve building entrances and street or highway at separate levels;

- 2. Sidewalks with greater cross slope along the curb and PARs with lesser cross slope along building fronts;
- 3. PARs along the curb and ramped entrances to buildings.

41-6.04(e) Alterations to Qualified Historic Facilities.

Where the State Historic Preservation Officer or Advisory Council on Historic Preservation determines that compliance with a requirement would threaten or destroy historically significant features of a qualified historic facility, compliance shall be required to the extent that it does not threaten or destroy historically significant features of the facility.

Where there is a federal agency "undertaking", as defined in 36 CFR 800.16 (y), the requirements in section 106 of the National Historic Preservation Act (16 U.S.C. 470f) and 36 CFR part 800 apply. Location of a facility within an historic district by itself does not excuse compliance with the requirements in this document. The State Historic Preservation Officer or Advisory Council on Historic Preservation must determine that compliance would threaten or destroy historically significant features of the facility. Reproductions or replications of historic facilities are not qualified historic facilities.

41-6.05 Pedestrian Access Route

A PAR shall be provided within sidewalks and other pedestrian circulation paths located in the public right-of-way. The pedestrian access route shall connect to accessible elements, spaces, facilities, and to other accessible routes not within the public right-of-way.

PARs shall consist of one or more of the following: sidewalks and other pedestrian circulation paths, or a portion of sidewalks and other pedestrian circulation paths; pedestrian street crossings and at-grade rail crossings; pedestrian overpasses and underpasses and similar structures; curb ramps and blended transitions; ramps; elevators and limited use/limited application elevators; platform lifts; and doors, doorways, and gates.

41-6.06 Alternate Pedestrian Access Route

When a pedestrian circulation path is temporarily closed by construction, alterations, maintenance operations, or other conditions, an alternate PAR shall be marked and/or provided. Any pedestrian barricades and channelizing devices shall comply with the *ILMUTCD*.

The *ILMUTCD* recommends that whenever possible, work should be done in a manner that does not create a need to detour pedestrians from existing pedestrian routes. Extra distance and additional pedestrian street crossings add complexity to a trip and increase exposure of risk to accidents.

SPECIAL DESIGN ELEMENTS

41-6.07 <u>Curb Ramps and Blended Transitions</u>

A curb ramp, blended transition, or a combination of curb ramps and blended transitions shall be installed to allow pedestrians to continue through pedestrian street crossings, alleys, or driveways. The curb ramp (excluding any flared sides) or blended transition shall be contained wholly within the width of the crossing served. In alterations where existing physical constraints prevent a curb ramp at each crossing, a single diagonal curb ramp shall be permitted to serve both pedestrian street crossings.

There are two types of curb ramps:

- Perpendicular curb ramps have a running slope that cuts through or is built up to the
 curb at right angles, or meets the gutter break at right angles where the curb is curved.
 On large corner radiuses, it will be necessary to indent the gutter break on one side of
 the curb ramp in order for the curb ramp to meet the gutter break at right angles.
- Parallel curb ramps have a running slope that is in-line with the direction of sidewalk travel and lower the sidewalk to a level turning space where a turn is made to enter the pedestrian street crossing.
- Parallel and perpendicular curb ramps may be combined. A parallel curb ramp is used to lower the sidewalk to a mid-landing and a short perpendicular curb ramp connects the landing to the street.

Blended transitions are similar to curb ramps. However, blended transitions have a less severe running slope and some other differences from curb ramp design. Raised pedestrian street crossings are considered blended transitions. Blended transitions are suitable for a range of sidewalk conditions and should be considered at level intersections.

The Department has developed a series of highway standards that provide the requirements for curb ramp and/or blended transition construction. However, these standards may not provide the contractor and LPA construction supervisor with enough information to ensure accessibility compliance at locations with severe slopes, existing site constraints, or other unique situations. Therefore, the LPA should consider providing plan details for each corner where curb ramps or blended transitions are being constructed.

41-6.08 Detectable Warning Surfaces

41-6.08(a) General

Detectable warning surfaces indicate the boundary between pedestrian and vehicular routes where there is a flush rather than a curbed connection and shall be provided at the following locations on the PAR and at transit stops:

- Curb ramps and blended transitions at pedestrian street crossings;
- Pedestrian refuge islands (minimum width 6 ft);
- Pedestrian at-grade rail crossings not located within a street or highway;
- Boarding platforms at transit stops for buses and rail vehicles where the edges of the boarding platform are not protected by screens or guards; and

 Boarding and alighting areas at sidewalk or street level transit stops for rail vehicles where the side of the boarding and alighting areas facing the rail vehicles is not protected by screens or guards.

Detectable warning surfaces should not be provided at crossings of residential driveways, since the pedestrian right-of-way continues across residential driveway aprons. However, where commercial driveways are provided with yield or stop control, detectable warning surfaces should be provided at the junction between the pedestrian route and the vehicular route.

41-6.09 Pedestrian Street Crossing

All pedestrian street crossings shall be accessible to pedestrians with disabilities. Where pedestrian signals are provided at pedestrian street crossings, they should consider accessible pedestrian signals

41-6.10 Protruding Objects

Objects along or overhanging any portion of a pedestrian circulation path shall not reduce the clear width required for the PAR.

41-6.11 **Signs**

Where audible sign systems and other technologies are used to provide information equivalent to the information contained on pedestrian signs and transit signs, the signs are not required to comply with accessibility requirements.

Audible sign systems and other technologies that provide information equivalent to the information contained on signs are more usable by pedestrians who are blind or have low vision. Remote infrared audible signs that transmit information to portable devices that are carried by and audible only to the user are an example of audible sign systems and other technologies.

41-6.12 Transit Stops and Transit Shelters

Where provided (regardless of who provides), transit stops and transit shelters shall comply with accessibility requirements.

Transit stops in the public right-of-way typically serve fixed route bus systems, including bus rapid transit systems, and light rail transit systems. Signs that identify the routes served by the transit stop shall comply with the technical requirements for visual characters on signs unless audible sign systems or other technologies are used to provide the information. The FHWA has issued guidance on the obligations of state transportation departments, metropolitan planning organizations, and transit agencies to coordinate the planning and funding of accessibility improvements to transit systems and facilities.

41-6.13 On-Street Parking

41-6.13(a) General

Where on-street parking is provided on the block perimeter and the parking is marked or metered (including pay stations), accessible parking spaces shall be provided. Where parking pay stations are provided and the parking is not marked, each 20.0 ft (6.1 m) of block perimeter where parking is permitted shall be counted as one parking space. Figure 41-6C specifies how many accessible parking spaces shall be provided on the block perimeter where on-street parking is marked or metered.

Accessible parking spaces shall be identified by signs complying with the *ILMUTCD*. Accessible parking spaces should be located where the street has the least crown and grade and close to key destinations.

| Total Number of Marked or Metered Parking Spaces on the Block Perimeter | Minimum Required Number of Accessible Parking Spaces |
|---|--|
| 1 to 25 | 1 |
| 26 to 50 | 2 |
| 51 to 75 | 3 |
| 76 to 100 | 4 |
| 101 to 150 | 5 |
| 151 to 200 | 6 |
| 201 and over | 4 percent of total |

ON-STREET PARKING SPACES

Figure 41-6C

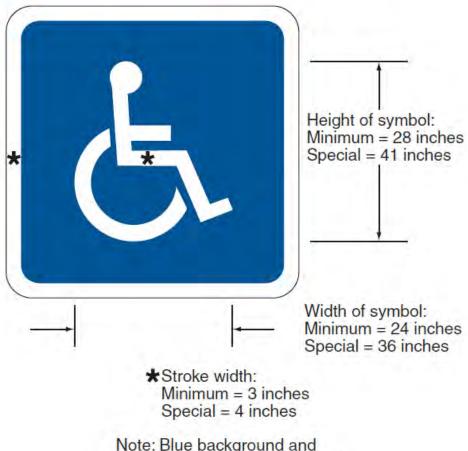

41-6.13(b) Signage

Accessible parking spaces shall be designated with a ground-mounted RESERVED PARKING for persons with disabilities (R7-8) sign with the \$_____ FINE (R7-I101) supplemental plaque. The amount of the fine shall be as established by 625 ILCS 5/11-1301.3(c). Signs shall be 7 ft (2.0 m) minimum above the finish floor or ground surface measured to the bottom of the sign, and no more than 2 ft (0.6 m) horizontally from the face of curb. Signs shall be located at the head or foot of the parking space so as not to interfere with the operation of a side lift or a passenger side transfer.

41-6.13(c) Pavement Marking

- 1. <u>Color.</u> Accessible parking spaces and access aisles shall be designated with white pavement marking and may be supplemented with blue pavement markings.
- 2. Width. Pavement marking shall be 3 in (75 mm) to 6 in (150 mm) wide.

- Access Aisle. When required, the access aisle shall be marked with 45 degree diagonal 3. lines. The diagonal lines should be 3 in (75 mm) to 6 in (150 mm) wide and separated by gaps of 12 in (300 mm) to 36 in (900 mm). The gap between the lines should not exceed 6 times the width of the diagonal lines.
- Symbol. The international symbol of accessibility should be used to provide additional 4. emphasis. See Figure 41-6D.

Note: Blue background and white border are optional

INTERNATIONAL SYMBOL OF ACCESSIBILITY FOR PAVEMENT MARKING Figure 41-6D

41-6.13(d) **Dimensions**

Where parking spaces are marked with lines, width measurements of parking spaces and access aisles shall be made from the centerline of the markings. The required size of parking spaces and access aisles shall be determine by the type of parking space.

41-6.13(e) Curb Ramps or Blended Transitions

Curb ramps or blended transitions complying with Section 41-6.07 shall connect the access aisle to the PAR. Curb ramps shall not be located within the access aisle. At parallel parking spaces, curb ramps and blended transitions should be located so that a van side-lift or ramp can be deployed to the sidewalk and the vehicle occupant can transfer to a wheelchair or scooter. Parking spaces at the end of the block face may be served by curb ramps or blended transitions at the pedestrian street crossing, provided that the curb ramp is not accessed from a travel lane.

Detectable warning surfaces are not required on curb ramps and blended transitions that connect the access aisle to the sidewalk, including where the sidewalk is at the same level as the parking spaces, unless the curb ramps and blended transitions also serve pedestrian street crossings.

41-6.14 Off-Street Parking

41-6.14(a) General

Accessible parking spaces for individuals with disabilities and accessible passenger loading zones that serve a particular building shall be the spaces or zones closest to the nearest accessible entrance on a PAR. In separate parking facilities that do not serve a particular building, locate parking spaces for individuals with disabilities on the shortest possible circulation route to an accessible pedestrian entrance of the parking facility. In buildings with multiple access entrances with adjacent parking, accessible parking spaces may be dispersed and located closest to the accessible entrances. The total number of accessible parking spaces may be distributed among parking facilities, if greater accessibility is achieved in consideration of such factors as anticipated usage, number and location of entrances and level parking areas. Figure 41-6E specifies how many accessible parking spaces shall be provided.

Each parking space shall have its own access aisle and all access aisles shall blend to a common level with an accessible route. Parking spaces and access aisles shall be level with surface slopes not exceeding 1:50 (2.0%) in all directions. Minimum vertical clearance of 98 in (2490 mm) at the parking space and along at least one vehicle access route to such spaces from site entrance(s) and exit(s) shall be provided.

BUREAU OF LOCAL ROADS & STREETS

OFF-STREET PARKING SPACES

Figure 41-6E

41-6.14(b) Signage

See Section 41-6.13(b).

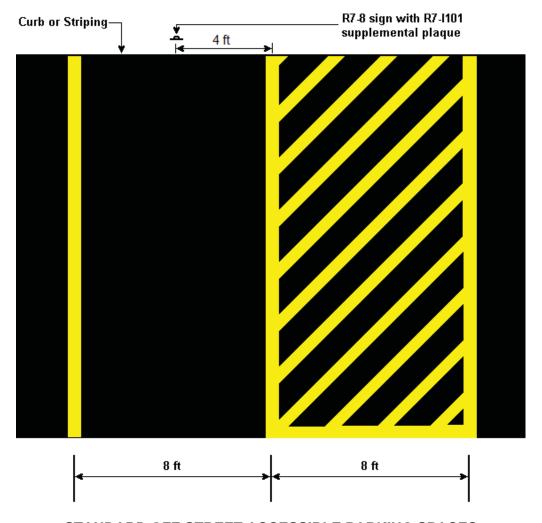

41-6.14(c) Pavement Marking

- 1. <u>Color</u>. Accessible parking spaces and access aisles shall be designated with yellow pavement marking.
- 2. <u>Width</u>. See Section 41-6.13(c).
- 3. Access Aisle. See Section 41-6.13(c).
- 4. <u>Symbol</u>. See Section 41-6.13(c).

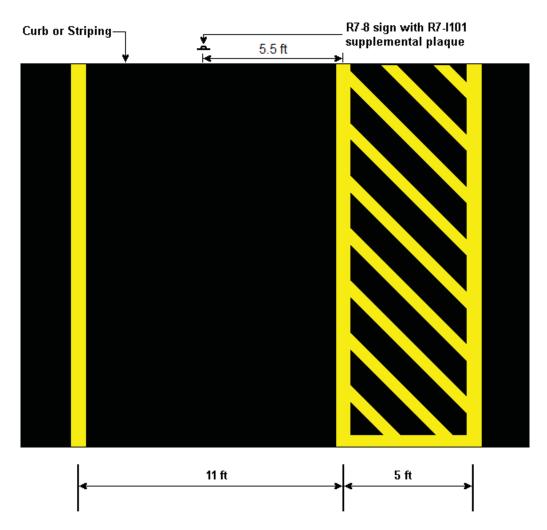

41-6.14(d) Dimensions

An accessible parking space shall consist of a 16 ft (4.9 m) wide parking space, which includes an 8 ft (2.4 m) wide access aisle (See Figure 41-6F). In the alternative, an accessible space may be 16 ft (4.9 m) wide, including a space 11 ft (3.4 m) wide with a 5 ft (1.5 m) access aisle (See Figure 41-6G).

A common access aisle shall not be shared between adjacent parking spaces. Access aisles shall be permitted to be placed on either side of the parking space except for angled parking spaces, which shall have access aisles located on the passenger side of the parking space.

STANDARD OFF-STREET ACCESSIBLE PARKING SPACES
Figure 41-6F

UNIVERSAL PARKING DESIGN OFF-STREET ACCESSIBLE PARKING SPACES
Figure 41-6G

41-6.15 Passenger Loading Zones

Where passenger loading zones other than transit stops are provided, at least one accessible passenger loading zone shall be provided for each 100.0 ft (30 m) of continuous loading zone space or fraction thereof. Accessible passenger loading zones must be identified by signs displaying the International Symbol of Accessibility.

41-6.16 Other

Where provided on pedestrian circulation paths, Stairways and Escalators (shall not be part of a PAR), Handrails, Doors, Doorways, and Gates; and Ramps shall comply with accessibility requirements.

Disclaimers:

- 1. Prices are estimated costs based on 2018 unit prices.
- 2. Design Engineering will be required to determine the exact limits of removal and replacement. Some assumptions have been been made based on typical repairs for the type of non-compliant issue.
- 3. Unit prices are presented with the assumption that several ramps will be replaced at the same, therefore there is some economy of scale. Replacement of a sinlge ramp may result in a higher price.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

Lisa Pickering, Deputy City Clerk

Date: August 14, 2018

Subject: Raintree Village – Units 4, 5 and 6 Basin Maintenance

Bids were received, opened and tabulated for work to be done on the project at 10:00 a.m., August 10th. Representatives of contractors bidding the project and our firm were in attendance. A tabulation of the bids and the engineer's estimate is attached for your information and record.

There are a couple of items to note:

- 1. The City Attorney recently ruled that landscape maintenance projects are not subject to prevailing wage. Previous quotes and work in the past several years on this project included paying prevailing wage, which was the prior direction.
- 2. The apparent low bid (Semper Fi), as read at the bid opening contained mathematical errors once they were tabulated. The errors are highlighted on the bid tab. There was a small error carried over in line item #3. The main error was that the amounts of the individual line items did not add up correctly, therefore the total was incorrect. Based on the correction, Pizzo & Associates is the new low bidder.

We therefore recommend the acceptance of the bid and approval of award be made to the low bidder, Pizzo & Associates, LTD., 10729 Pine Road, Leland, Illinois 60531 in the amount of \$15,300.00. This work will be for maintenance in the fall of 2018 and all of 2019.

If you have any questions or require additional information, please let us know.

Memorandum

To: Bart Olson, City Administrator

From: Brad Sanderson, EEI

CC: Eric Dhuse, Director of Public Works

Krysti Barksdale-Noble, Community Dev. Dir.

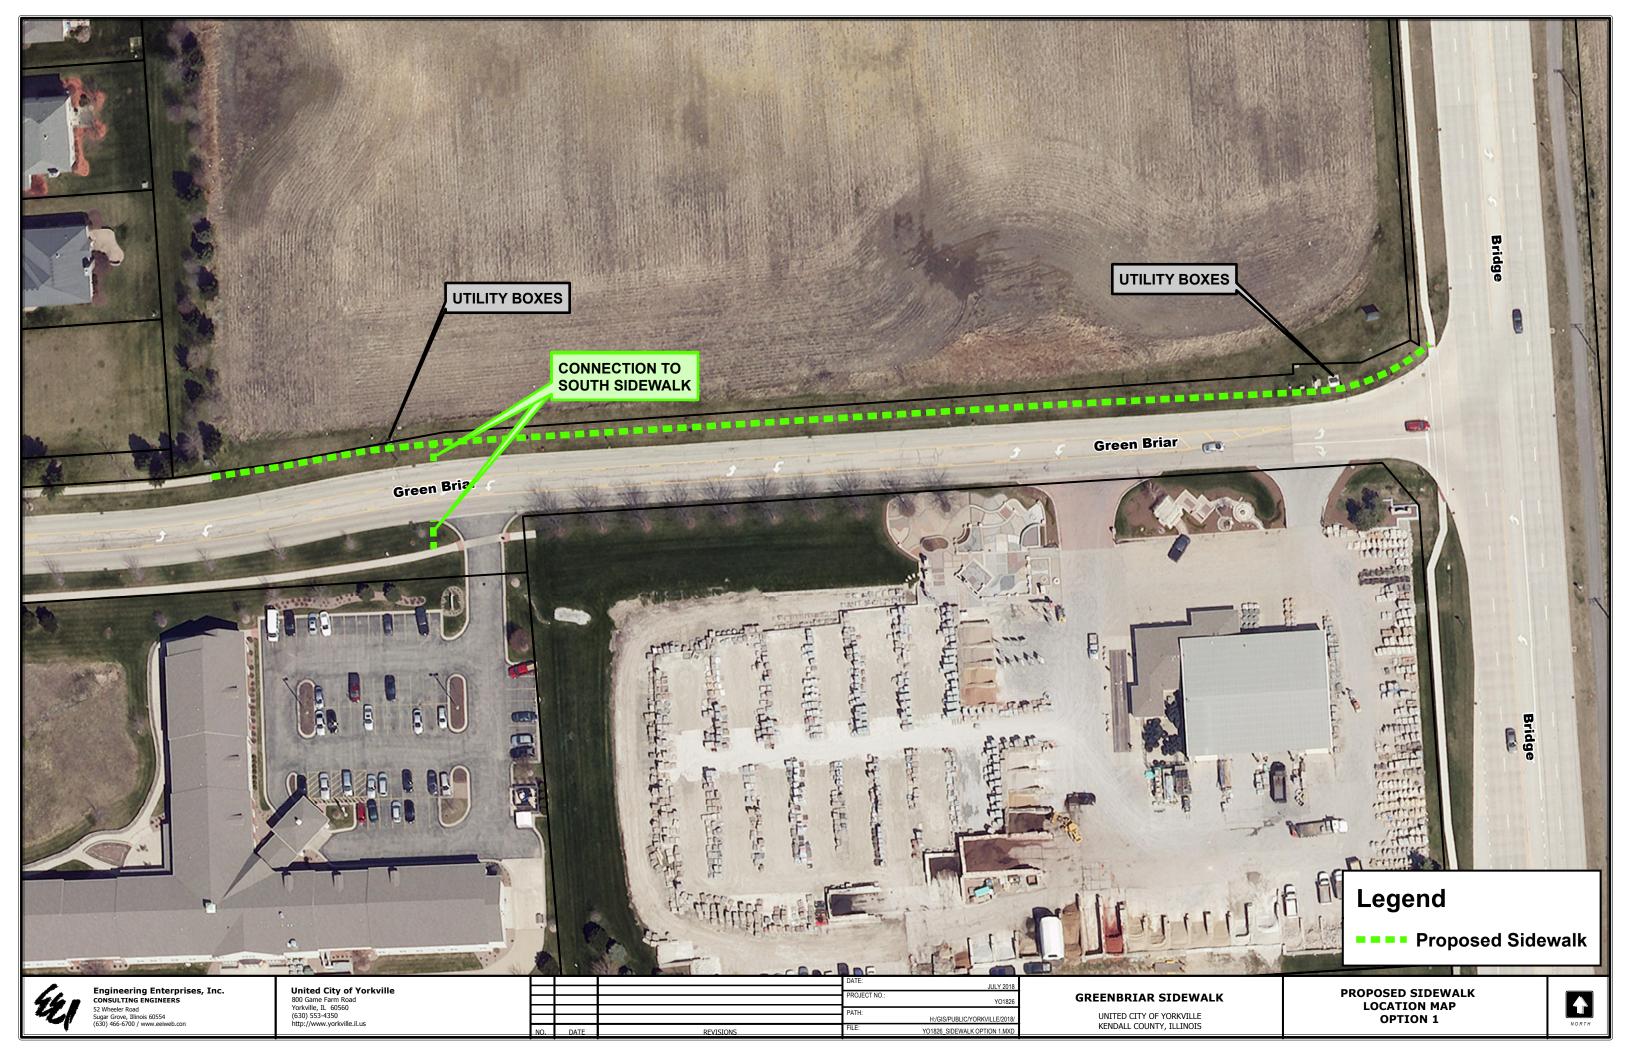

Lisa Pickering, Deputy City Clerk

Date: August 14, 2018

Subject: Ground Effects Sidewalk

Together with Public Works we have refined and adjusted the cost estimates. The new estimates account for several of the work items to be completed by the Public Works Department. All items not able to be performed by Public Works will need to be contracted separately.

We will be prepared to discuss further at the committee meeting.
