

UNITED CITY OF YORKVILLE 50/50 PARKWAY TREE PROGRAM

The trees shown below give general descriptions of the character and habitat of the species. The chosen variety will be based on availability the time the City places the order with the nursery.

Catalpa

\$250.00

The Northern Catalpa tree has long thin seed pods and showy clustered white bell shaped flowers in the spring. The tree prefers moist, well-drained soils, but can tolerate wet, dry and high pH soils. The fall color is brown-green, and the fruit can be messy in the fall. Mature height is 50'-80'.

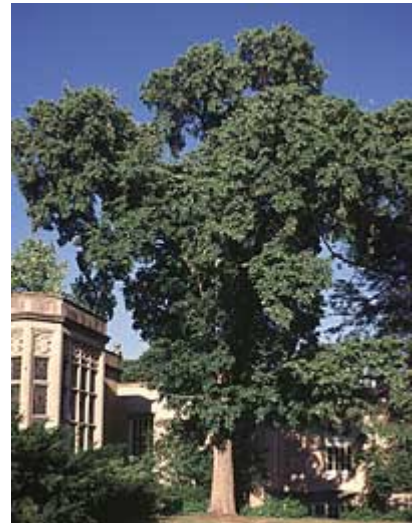

Elm

\$250.00

The broad arching habit of the hybrid elm tree still mimics the classic elm. Dutch Elm Disease resistant, hybrid elms grow to 60' tall and have a nice light yellow to yellow-green fall color. These trees are susceptible to Japanese Beetles. The tree can tolerate wet sites and a range of soil pH.

Varieties: 'Valley Forge', 'Princeton', 'New Harmony', 'Homestead', 'Morton', 'Morton Glossy'

Common Hackberry

\$250.00

Hackberry survives best in moist, well-drained soils, but can tolerate wet soils. Tolerant of salt, wind, dry sites, and alkaline soils, this tree adapts well to its environment. Fall color is green-yellow and grows to heights of 50'-90'.

Varieties: 'Chicagoland', 'Windy City'

Kentucky Coffeetree

\$250.00

Kentucky Coffeetree can tolerate dry to moist, well-drained soils, and is salt and drought tolerant. The varieties selected are male only and do not produce seed pods. In the spring the flowers are greenish-white pyramidal spikes and the fall color is yellow-orange. This tree can reach up to 75' feet in height and is a fast grower. Please note these trees look quite spindly with a couple of branches in their first several years, but will eventually fill in to a magnificent tree!

Varieties: 'Espresso', 'Prairie Titan'

Oak

\$250.00

Bur Oak or Swamp White Oak, Chinquapin. Oak trees are more sensitive to moving environments, and must be planted in the spring. At maturity, they can reach up to 75' in height. Oaks typically tolerate wet and dry soil, salt, and wind. They can survive in any soil condition, and are slow growing. The fall color ranges from brown-green to yellow. These trees are planted in the spring to ensure better survival. Oaks have a higher survival rate if they are transplanted in the spring.

Maple

\$250.00

Maple trees can reach up to 50' in height, and prefer moist, well-drained soils. Fall color is yellow to orange to red for Sugar Maples and red for Red Maples. Maples are fast growers.

Varieties: 'Autumn Flame', 'Franksred', 'October Glory', 'Red Sunset', 'Armstrong', 'Commemoration', 'Majesty', 'Firefall', Celebration, 'Sienna Glen', 'Fall Fiesta'. Some varieties may not be available every year. Substitutions may have to be made, but the City will make every attempt to fulfill the original request.

Thornless Honeylocust

\$250.00

Thornless Honeylocust tolerates moist, well-drained soils, drought conditions, and salt. The rounded, open, habit has small compound leaves that provide light shade. Fall color is yellow. Mature height of the species is 40'-70'.

Varieties: 'Skyline', 'Shademaster'
