**ILLINOIS ENVIRONMENTAL PROTECTION AGENCY
ANNUAL FACILITY INSPECTION REPORT
NPDES PERMIT FOR STORM WATER DISCHARGES
FROM MUNICIPAL SEPARATE STORM SEWER SYSTEMS (MS4)**

UNITED CITY OF YORKVILLE, IL: MARCH 2015 TO MARCH 2016

THE FOLLOWING ITEMS MUST BE ADDRESSED.

A. CHANGES TO BEST MANAGEMENT PRACTICES (BMP CHANGES).

The City modified their Best Management Practices program and Stormwater Management Plan in 2013 with their Annual Report for the 2012-2013 permit year. These modifications were also incorporated into the 2014 Renewal Notice of Intent for the current 5 year permit cycle. There are no further changes being proposed to the City program at this time. The City will investigate a return to a more active program in the future if budget and staff considerations allow it.

However, the City will be revising the program to include the required updates contained in the new Permit (Section D). All incorporated changes are expected to be in place by September 1, 2016 as required by the new permit.

B. STATUS OF COMPLIANCE WITH PERMIT CONDITIONS AND ASSESSMENT OF THE APPROPRIATENESS OF THE IDENTIFIED BEST MANAGEMENT PRACTICES TOWARDS ACHIEVING THE STATUTORY GOAL OF REDUCING THE DISCHARGE OF POLLUTANTS TO THE MEP, AND THE IDENTIFIED MEASURABLE GOALS FOR EACH OF THE MINIMUM CONTROL MEASURES.

The City has endeavored to meet the requirements of the permit conditions as outlined in the SMPP and in consideration of current staffing and budget constraints. The status of the permit activities for the reporting period is as follows.

Public Education and Outreach

The City maintains an information center at City Hall that includes informational items regarding stormwater related issues.

The City is in compliance with minimum control measures by providing public education and outreach materials at the City Hall and on its website.

Public Participation and Involvement

The City maintains documentation on the number and type of calls received from the public regarding potential illicit discharges. The City did not receive any calls in this reporting period. While the City did not hold Environmental Fair this year they did start an electronics recycling program and hold a special electronics recycling drive.

The above activities demonstrate the City's compliance with minimum control measures for Public Participation and Involvement.

Construction Site Runoff Control

The City tracks site development permits issued and requires compliance with Construction Runoff Controls in their ordinances where required. The City documents citizen complaints, if any, regarding

construction site runoff and implements and documents follow up procedures. There were no complaints regarding erosion control during the reporting period. The City inspects construction sites for erosion and sediment control as required by the NPDES Permit and the City's Erosion and Sediment Control provisions in their Stormwater Ordinance

The above activities demonstrate the City's compliance with minimum control measures for Construction Site Runoff Control.

Post Construction Site Runoff Control

The City developed a database of basins and provides support and assistance for citizens regarding post construction runoff control on an as requested basis. However, no post construction runoff basin related complaints from citizens were received. The City maintains a database of Home Owners Associations (HOA) and encourages HOAs to inspect and maintain their stormwater management basins and makes information available and provides assistance on an as needed basis when requested by HOAs. The City requires new developments to enter into maintenance agreements for stormwater facilities. There were no new developments requiring maintenance agreement in the reporting period.

The City is in compliance with minimum control measures for Post Construction Runoff Control because their ordinances address post construction requirements and City staff responds to citizen complaints and HOA requests for information and assistance.

Illicit Discharge Detection and Elimination

The City maintains and updates as necessary their stormwater Outfall Inventory. In addition, the City tracks the number and types of Illicit Discharges and the steps taken to eliminate the discharge as potential discharges are brought to their attention. There were no illicit discharges reported during the reporting period. The City staff will take action if problems with the outfalls are reported to the City.

The City is in compliance with the minimum control measures for Illicit Discharge Detection and Elimination because they have ordinances and procedures in place to address and correct illicit discharge when they are discovered. The City takes action as necessary in accordance with these ordinances when illicit discharges or problems with stormwater outfalls are reported.

Pollution Prevention and Good Housekeeping

The City provided services and maintained records for the following good housekeeping activities: number of curb miles swept, amount of leaves collected, amount of road salt used, number of catch basins cleaned, and the amount of herbicides and pesticides used, and training provided for employees. Due to budget constraints no formal NPDES training was provided to employees; however, employees are kept informed on best management practices through implementation of the SMPP.

These activities place the City in compliance with the minimum control measures for Pollution Prevention and Good Housekeeping.

C. RESULTS OF INFORMATION AND DATA COLLECTED AND ANALYZED.

The following data was collected or information analyzed for the above permit cycle and is attached to this report.

Public Education and Outreach

No data was collected or information analyzed in this area during the reporting period.

Public Participation and Involvement

No data was collected or information analyzed in this area during the reporting period.

Construction Site Runoff Control

No data was collected or information analyzed in this area during the reporting period.

Post Construction Site Runoff Control

No data was collected or information analyzed in this area during the reporting period.

Illicit Discharge Detection and Elimination

No data was collected or information analyzed in this area during the reporting period.

Pollution Prevention and Good Housekeeping

The City swept 330 curb miles in the reporting period.

The City collected 1050 cubic yards of leaves chopped to an 8:1 ratio during their fall collection.

The City used 1000 tons of road salt and 15,000 gallons of 23% slat brine for ice control during the winter.

The City cleaned 145 catch basins and checked restrictors and cleaned storm drain covers after each significant rainfall event during the reporting period.

The City applied 50 gallons of herbicides and pesticides and contracted to have insecticide caches placed in all catch basins for mosquito control during the reporting period.

D. SUMMARY OF STORM WATER ACTIVITIES PLANNED FOR THE NEXT REPORTING CYCLE.

In addition to continuing City programs, the City will be revising the current program to implement requirements contained in the new Permit. Implementation of the new BMPs will be in place by September 1, 2016 and presented to IEPA in the 2017 Annual Report. Also, at a minimum the following best management practices are to be implemented in the upcoming 2016-2017 year in accordance with the schedule in the City's NOI.

The City is proposing to follow the plan of activities as described in their approved SMPP for the upcoming year. These activities would include the following.

Public Education and Outreach

The City will continue to maintain an information center at City Hall that contains stormwater and recycling related information for City residents.

Public Participation and Involvement

The City will continue to maintain documentation regarding the number and type of calls received from the public regarding potential illicit discharges.

Construction Site Runoff Control

The City will continue to track the number of site development permits issued. The City will continue to document and follow up on citizen complaints regarding construction site runoff. The City will continue to

inspect active construction sites in accordance with NPDES Permit and Erosion and Sediment Control Ordinance requirements.

Post Construction Site Runoff Control

The City will maintain their databases of HOAs and Stormwater Basins and update as necessary. The City will provide information and assistance to citizens and HOAs on an as requested basis. The City will continue to require new developments to enter into maintenance agreements for their stormwater basins.

Illicit Discharge Detection and Elimination

The City will continue to track the number and type of potential illicit discharges and problems with stormwater outfalls that are reported. The City will document the incidents and the corrective actions on their summary forms and in accordance with their ordinances and procedures.

Pollution Prevention and Good Housekeeping

The City will continue to provide services and maintain records for the following good housekeeping activities: number of curb miles swept, amount of leaves collected, amount of road salt used, number of catch basins cleaned, and the amount of herbicides and pesticides used, and training provided for employees.

E. NOTICE OF PERMIT OBLIGATIONS SATISFIED BY OTHER GOVERNMENT ENTITY.

The City is not depending on other units of government to meet any of its' permit obligations.

F. LIST OF CONSTRUCTION PROJECTS PAID FOR BY THE CITY OF YORKVILLE FOR THE 2015-2016 REPORTING PERIOD.

The following City funded construction projects were underway in the 2015-2016 reporting period.

- 2015 Road Program
- Game Farm and Somonauk Street Improvements
- 2015 Sanitary Sewer Lining
- Ridge Street Water Main
- Well No. 8 Rehabilitation
